The studies presented in this thesis were performed at the Department of Human Genetics and the Department of Pathology of the Leiden University Medical Center (LUMC). The studies described in this thesis were partially supported by the prof. A.A.H. Kassenaar Foundation.

Financial support for the publication of this thesis has been provided by the J.E. Jurriaanse Stichting and MRC-Holland.

In science it often happens that scientists say, "You know that's a really good argument; my position is mistaken," and then they actually change their minds and you never hear that old view from them again. They really do it. It doesn't happen as often as it should, because scientists are human and change is sometimes painful. But it happens every day. I cannot recall the last time something like that happened in politics or religion.
