Cardiovascular Magnetic Resonance Imaging Techniques in Hypertension and Diabetes

Proefschrift

Ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van de Rector Magnificus Prof. mr. P.F. van der Heijden,
volgens besluit van het college voor Promoties
te verdedigen op donderdag 10 maart 2011 klokke 13:45 uur

door

Anne Brandts

The research described in this thesis was carried out at the departments of Radiology (head: Prof. Dr. J.L. Bloem) and General Internal Medicine and Endocrinology, Section of Vascular Medicine (head: Prof. Dr. J.W.A. Smit) of de Leiden University Medical Center.

Financial support by the Netherlands Heart Foundation and the Dutch Diabetes Foundation for the publication of this thesis is gratefully acknowledged. Additional financial support is provided by the J.E. Jurriaanse Foundation; Foundation Imago Oegstgeest; Division of Image Processing (LKEB); Philips Healthcare Nederland; Toshiba Medical Systems Nederland; Sectra Medical Systems; Servier Nederland Farma BV; Guerbet Nederland BV; Bayer Schering Pharma; Novo Nordisk BV; Boehringer Ingelheim BV; Sanofi Aventis BV.

Contents

Chapter 1.	General introduction and outline	9
Chapter 2.	The effect of hypertension on aortic pulse wave velocity in type-1 diabetes mellitus patients: assessment with MRI <i>submitted</i>	17
Chapter 3.	Associations between vessel wall thickness in the aorta and carotid arteries and aortic pulse wave velocity in patients with hypertension: assessment with MRI <i>submitted</i>	29
Chapter 4.	Association of aortic arch pulse wave velocity with left ventricular mass and lacunar brain infarcts in hypertensive patients: assessment with MRI <i>Radiology 2009;253:681-688.</i>	43
Chapter 5.	Aortic stiffness is associated with cardiac function and cerebral small vessel disease in patients with type-1 diabetes mellitus: assessment by MRI <i>Eur Radiol 2010;20:1132-1138.</i>	59
Chapter 6.	Cerebral perfusion and aortic stiffness are independent predictors of white matter brain atrophy in type-1 diabetes mellitus patients, assessed with magnetic resonance imaging <i>Diabetes Care, accepted</i>	73
Chapter 7.	Right coronary artery flow velocity and volume assessment with spiral K-space sampled breathhold velocity-encoded MRI at 3 tesla: accuracy and reproducibility <i>J Magn Reson Imaging 2010;31:1215-1223.</i>	85
Chapter 8.	Quantitative assessment of left ventricular function in humans at 7 T <i>Magn Reson Med 2010;64:1471-1477.</i>	101
Chapter 9.	Diastolic function assessment from three-dimensional three-directional velocity-encoded MRI <i>J Magn Reson Imaging, accepted</i>	115
