Title: The course of clinically suspect arthralgia and early rheumatoid arthritis : clinical features, imaging and genetics

Issue Date: 2016-11-08

**The course of Clinically
Suspect Arthralgia and early
Rheumatoid Arthritis**

Clinical features, imaging and genetics

Hanna van Steenberg
2016

The studies described in this thesis were performed at the Department of Rheumatology of the Leiden University Medical Centre, Leiden, the Netherlands

ISBN/EAN: 978-94-623-33307

Printing of the thesis was supported by the Dutch Arthritis Foundation, Stichting MCH en Bronovo-Nebo, Pfizer BV, AbbVie BV, UCB Pharma BV and ChipSoft.

Cover design and thesis layout: Martin Berndsen

Printing: Gildeprint - Enschede

Proefschrift

ter verkrijging van

de graad van Doctor aan de Universiteit Leiden,

Op gezag van Rector Magnificus prof. mr. C.J.J.M. Stolker,

volgens besluit van het College voor Promoties

te verdedigen op dinsdag 8 november 2016

klokke 15:00 uur

Door Hanna Willemijn van Steenbergen

geboren te Delft

in 1988

Promotores

Prof. dr. T.W.J. Huizinga

Prof. dr. A.H.M. van der Helm-Van Mil

Leden promotiecommissie

Prof. dr. G. Kloppenburg

Prof. dr. R.B.M. Landewé (AMC/Universiteit van Amsterdam)

Prof. dr. J. Houwing-Duistermaat

Prof. dr. M. Hazes (Erasmus MC)

CONTENTS

Chapter 1	Introduction	7
Part I: Phase of Clinically Suspect Arthralgia		
Chapter 2	The preclinical phase of rheumatoid arthritis: what is acknowledged and what needs to be assessed?	23
Chapter 3	Characterising arthralgia in the preclinical phase of rheumatoid arthritis using MRI	45
Chapter 4	Subclinical inflammation on MRI of hand and foot of ACPA-negative arthralgia patients at risk for rheumatoid arthritis	61
Chapter 5	Clinical factors, ACPA and MRI-detected subclinical inflammation in relation to progression from Clinically Suspect Arthralgia to arthritis	73
Chapter 6	Clinical expertise and its accuracy in differentiating arthralgia patients at risk for rheumatoid arthritis from other patients presenting with joint symptoms	93
Chapter 7	EULAR definition of arthralgia suspicious for progression to rheumatoid arthritis.	97
Part II: Genetic factors and disease outcome in rheumatoid arthritis		
Chapter 8	Predicting the severity of joint damage in rheumatoid arthritis; the contribution of genetic factors	113
Chapter 9	Does a genetic variant in <i>FOXO3A</i> predict a milder course of rheumatoid arthritis? – a multi-cohort study	129
Chapter 10	<i>SPP1</i> rs9138 variant contributes to the severity of radiological damage in ACPA-negative rheumatoid arthritis	137
Chapter 11	A genetic study on <i>C5-TRAF1</i> and progression of joint damage in rheumatoid arthritis	145
Chapter 12	Association of Valine and Leucine at HLA-DRB1 position 11 with radiographic progression in rheumatoid arthritis, independent of the shared epitope alleles but not independent of ACPA	163
Chapter 13	<i>IL2RA</i> is associated with persistence of rheumatoid arthritis	181
Chapter 14	Osteoprotegerin as biomarker for persistence of rheumatoid arthritis	197

Part III: Other outcomes in rheumatoid arthritis

Chapter 15	DMARD-free sustained remission in rheumatoid arthritis: an increasingly achievable outcome with subsidence of disease symptoms	203
Chapter 16	Fatigue in rheumatoid arthritis; a persistent problem: a large longitudinal study	219
Chapter 17	Summary and discussion	235
Chapter 18	Nederlandse samenvatting	251
	Curriculum Vitae	259
	Publications	260
	Dankwoord	265
