## **Proefschrift**

ter verkrijging van  
de graad van Doctor aan de Universiteit van Leiden,  
op gezag van de Rector Magnificus prof.mr. P.F. van der Heijden,  
volgens besluit van het College voor Promoties  
te verdedigen op 16 september 2008  
klokke 13:45 uur

door

**Marieke Pennings**  
geboren te Zaanstad  
in 1976

## **Promotiecommissie**

Promotor : Prof. Dr. Th.J.C. Van Berkel

Co-promotor : Dr. M. Van Eck

Referent : Prof. Dr. Ir. L.M. Havekes

Overige leden : Prof. Dr. M. Danhof  
Dr. A.K. Groen (UvA)  
Prof. Dr. E.R. de Kloet  
Prof. Dr. F. Kuipers (RUG)

The study described in this thesis was financially supported by a ZonMw grant (192-02-063) and was performed at the Division of Biopharmaceutics of the Leiden Amsterdam Center for Drug Research, the Netherlands.

# Contents

Chapter 1	Introduction	7
Chapter 2	Regulation of cholesterol homeostasis in macrophages and consequences for atherosclerotic lesion development	19
Chapter 3	Bone marrow derived multidrug resistance protein ABCB4 protects against atherosclerotic lesion development in LDL receptor knock out mice	39
Chapter 4	Scavenger receptor BI and ATP-binding cassette transporter A1 in reverse cholesterol transport and atherosclerosis	59
Chapter 5	ABCA1/SR-BI double deficient mice demonstrate the independent roles for ABCA1 and SR-BI in reverse cholesterol transport	79
Chapter 6	Massive foam cell formation, atherosclerotic lesion development, and inflammation by combined deletion of ABCA1 and SR-BI in bone marrow-derived cells in LDL receptor knockout mice	95
Chapter 7	Summary and concluding remarks	119
	Nederlandse Samenvatting	125
	Abbreviations	133
	Publications	135
	Curriculum Vitae	137
