Generalised osteoarthritis: from Mendelian disorder to complex disease

Josine Min

Generalised osteoarthritis: from Mendelian disorder to complex disease

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van de Rector Magnificus Dr. D.D. Breimer,
hoogleraar in de faculteit der Wiskunde en
Natuurwetenschappen en die der Geneeskunde,
volgens besluit van het College voor Promoties
te verdedigen op woensdag 17 januari 2007

klokke 13.45 uur

door

Josine Louise Min
geboren te Alkmaar
in 1978

Promotiecommissie

Promotores: Prof. dr. P.E. Slagboom

Prof. dr. C.M. van Duijn (Erasmus Universiteit Rotterdam)

Copromotor: Dr. I. Meulenbelt

Referent: Dr. J. Loughlin (University of Oxford, United Kingdom)

Overige leden: Prof. dr. F.C. Breedveld

Prof. dr. J.C. van Houwelingen

The studies presented in this thesis were performed at the Leiden University Medical Centre. This work was financially supported by the Netherlands Organisation for Scientific Research (grant 904-61-095).

ISBN-10: 90-6464-054-8

ISBN-13: 978-90-6464-054-4

Cover design: Thorhildur Juliusdottir

Printed by Ponsen & Looijen B.V., Wageningen

The publication of this thesis was financially supported by the Netherlands Organisation for Scientific Research and the Dutch Arthritis Association.

Content

| | |
|---|-----|
| Chapter 1 General introduction | 7 |
| Chapter 2 High microsatellite and SNP genotyping success rates established in a large number of genomic DNA samples extracted from mouth swabs and genotypes | 31 |
| Chapter 3.1 Association of the frizzled-related protein gene with symptomatic osteoarthritis at multiple sites | 41 |
| Chapter 3.2 Association of matrilin-3 polymorphisms with spinal disc degeneration and with osteoarthritis of the CMC1 joint of the hand | 49 |
| Chapter 4 A genome-wide scan in Dutch sibling pairs reveals the <i>DIO2</i> gene as new candidate gene for osteoarthritis at multiple joint sites | 65 |
| Chapter 5.1 Strong linkage on 2q33.3 to familial early onset generalised osteoarthritis and a consideration of two positional candidate genes | 81 |
| Chapter 5.2 Mutation analysis of candidate genes within the 2q33.3 linkage area for familial early onset generalised osteoarthritis | 97 |
| Chapter 6 Summary and general discussion | 115 |
| Chapter 7 Nederlandse Samenvatting | 133 |
| List of publications | 139 |
| Curriculum vitae | 141 |
| Nawoord | 143 |
