Development of a vernix caseosa substitute

A novel strategy to improve skin barrier function and repair

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof.mr. P.F. van der Heijden,
volgens besluit van het College voor Promoties
te verdedigen op dinsdag 17 maart 2009
klokke 16.15 uur

door

Robert Reißmann

geboren te Berlijn, Duitsland
in 1977

Promotiecommissie

Promotoren: Prof. Dr. J.A. Bouwstra
Prof. Dr. W.E. Hennink (Universiteit Utrecht)

Copromotor: Dr. M. Ponec

Referent: Dr. A.V. Rawlings (AVR Consulting, UK)

Overige leden: Prof. Dr. M. Danhof
Prof. Dr. H.W. Frijlink (Universiteit Groningen)
Prof. Dr. W. Jiskoot
Dr. S. Pavel

The investigations described in this thesis were performed at the Division of Drug Delivery Technology of the Leiden/Amsterdam Center for Drug Research, Leiden University, Leiden, The Netherlands. The studies were financed by the Dutch Technology Foundation (STW LGT6117).

The publication of the thesis was financially supported by the Dutch Technology Foundation, the Leiden/Amsterdam Center for Drug Research and Croda Europe Ltd (UK).

Table of Contents

Chapter 1 - General introduction	7
<i>Part I – Detailed characterization of vernix caseosa (lipids)</i>	
Chapter 2 - New Insights into ultrastructure, lipid composition and organization of vernix caseosa	27
Chapter 3 - Temperature-induced changes in structural and physicochemical properties of vernix caseosa	49
Chapter 4 - Long periodicity phase in extracted lipids of vernix caseosa obtained with equilibration at physiological temperature	67
<i>Part II – Mimicking vernix caseosa (lipids)</i>	
Chapter 5 - Lanolin-derived lipid mixtures mimic closely the composition and organization of vernix caseosa lipids	87
Chapter 6 - Mimicking vernix caseosa - preparation and characterization of synthetic biofilms	111
<i>Part III – In vivo studies to test biological efficacy of natural and synthetic biofilm(s)</i>	
Chapter 7 - Development of a murine model to evaluate the effect of vernix caseosa on skin barrier recovery	129
Chapter 8 - Skin barrier disruption by acetone – observations in a hairless mouse model	147
Chapter 9 - Effect of synthetic vernix biofilms on barrier recovery of damaged mouse skin	159
Chapter 10 - Summary and perspectives	181
<i>Appendix</i>	
Samenvatting (Dutch Summary)	195
List of abbreviations	203
List of publications	205
Curriculum Vitae	207
Acknowledgements	209
