Title: Neural control of lipid metabolism and inflammation : implications for atherosclerosis

Issue Date: 2015-11-18

NEURAL CONTROL OF LIPID METABOLISM AND INFLAMMATION
IMPLICATIONS FOR ATHEROSCLEROSIS

SANDER KOOIJMAN

Neural control of lipid metabolism and inflammation: implications for atherosclerosis
2015, Sander Kooijman

NEURAL CONTROL OF LIPID METABOLISM AND INFLAMMATION

IMPLICATIONS FOR ATHEROSCLEROSIS

Proefschrift

Ter verkrijging van de graad van Doctor aan de Universiteit Leiden, op gezag van
Rector Magnificus prof. mr. C.J.J.M. Stolker, volgens besluit van het College voor
Promoties te verdedigen op woensdag 18 november 2015 klokke 13.45 uur

door

Sander Kooijman

Geboren te 's-Gravenhage
in 1987

Promotores: Prof. dr. P.C.N. Rensen
Prof. dr. ir. L.M. Havekes

Promotiecommissie: Prof. dr. J.A.P. Willems van Dijk
Prof. dr. J.H. Meijer
Prof. dr. A. Kalsbeek (NIH, Amsterdam)
Prof. dr. J.A. Romijn (AMC, Amsterdam)
Prof. dr. P. Schrauwen (MUMC, Maastricht)

Het onderzoek dat aan dit proefschrift ten grondslag ligt is mogelijk gemaakt door een subsidie van de Nederlandse Hartstichting (NHS-2009T038).

TABLE OF CONTENTS

Chapter 1	General introduction and outline	7
PART I		
Chapter 2	Inhibition of the central melanocortin system decreases brown adipose tissue activity <i>J Lipid Res</i> (2014) 55: 2022-32	23
Chapter 3	Central GLP-1 receptor signalling accelerates clearance of triacylglycerol and glucose by activating brown adipose tissue in mice <i>Diabetologia</i> (2015) <i>in press</i>	47
Chapter 4	Prolonged daily light exposure increases body fat mass through attenuation of brown adipose tissue activity <i>Proc Natl Acad Sci USA</i> (2015) 112: 6748-53	65
Chapter 5	Daily and seasonal encoding of rhythms in brown adipose tissue activity <i>In preparation</i>	89
Chapter 6	Peripheral cannabinoid 1 receptor blockade activates brown adipose tissue and diminishes dyslipidemia and obesity <i>FASEB J</i> (2014) 28: 5361-75	107
PART II		
Chapter 7	Hematopoietic α7 nicotinic acetylcholine receptor deficiency increases inflammation and platelet activation status, but does not aggravate atherosclerosis <i>J Thromb Haemost</i> (2015) 13: 126-35	139
Chapter 8	Splenic denervation does not aggravate atherosclerotic lesion development in APOE ^{*3} -Leiden.CETP transgenic mice <i>Am J Physiol Heart Circ Physiol</i> (2015) 309: H646-54	161

Chapter 9	General discussion and future perspectives	179
Chapter 10	Summary	195
	Nederlandse samenvatting	199
	List of publications	205
	Curriculum vitae	207
