geboren te Assen in 1984

Contents

Part I. General introduction

Chapter 1.	Introduction	9
------------	--------------	---

Part II. Evidence based medicine in elderly breast cancer patients

Chapter 2.	Limited evidence base for locoregional treatment of patients aged 75 years or older with early stage breast cancer	19
------------	--	----

Chapter 3.	The external validity of a clinical trial comprising elderly patients with hormone receptor positive breast cancer	37
------------	--	----

Chapter 4.	Adherence to treatment guidelines and survival by age at diagnosis in patients with early stage breast cancer	51
------------	---	----

Part III. Breast cancer outcome in elderly breast cancer patients

Chapter 5.	Association between age at diagnosis and disease specific mortality among postmenopausal women with hormone receptor positive breast cancer	67
------------	---	----

Chapter 6.	Elderly postmenopausal patients with breast cancer are at increased risk for distant recurrence	85
------------	---	----

Chapter 7.	Association between age at diagnosis and relative survival in elderly breast cancer patients from the general population	97
------------	--	----

Part IV. Treatment outcome in elderly breast cancer patients

Chapter 8.	Breast conserving surgery with or without radiotherapy in older patients with early stage breast cancer – a systematic review and meta-analysis	111
------------	---	-----

Chapter 9.	Age specific nonpersistence of endocrine therapy in postmenopausal patients with hormone receptor positive breast cancer	127
------------	--	-----

Chapter 10.	Management of primary metastatic breast cancer in the elderly - an international comparison of oncogeriatric versus standard care	147
-------------	---	-----

Part V. Discussion

Chapter 11.	Discussion	165
-------------	------------	-----

Part VI. Appendices

Nederlandse samenvatting	183
--------------------------	-----

List of co-authors	195
