## **Curriculum vitae**

The author of this thesis was born August 10, 1964 in Bandung, Indonesia. As a young infant she moved with her parents to the Netherlands, growing up in Voorburg, a suburb of The Hague. After finishing High School (Gymnasium beta) at the St. Maartenscollege in Voorburg (1976-1982), she started Medical School at the Leiden University Medical Centre (LUMC). The last part of her medical studies were spent in research at the Otobiological Research Laboratories, Ohio State University, Columbus, Ohio, USA (Dr. D.J. Lim) in association with the department of Otorhinolaryngology of the LUMC (Prof. Dr. J.J. Grote). In 1990 she graduated from Medical School with honors. After working as an intern in general surgery (Groene Hart Ziekenhuis Gouda) and neuroradiology (LUMC), she started her Radiology residency at the LUMC in 1992 (Prof. Dr. A.E. van Voorthuisen and Prof. Dr. J.L. Bloem). Following her fellowship in Neuroradiology and Head & Neck Radiology (1997-1998), she worked as a junior radiologist at the department of Radiology at the LUMC, in the areas of Neuroradiology and Head & Neck radiology, ultrasonography, mammography, and pediatric radiology. From December 2005, she worked as a radiologist at the department of Radiology, Radboud University Nijmegen Medical Centre (Prof. Dr. G.J. Blickman). She was secretary of the Head & Neck section of the Radiological Society of the Netherlands (2002-2008). Since October 2008 she holds position of senior consultant radiologist in Singapore. Work on this thesis (prof. Dr. M.A. van Buchem) commenced in 2000, after a false start in 1996, with the inspiring collaboration of Dr. G. van Wezel-Meijler (department of Neonatology, LUMC) and Dr. J. van der Grond (department of Radiology, LUMC).
