Genetics, statins, and lipid metabolism in cardiovascular disease

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof.mr. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op woensdag 28 januari 2015
klokke 16.15 uur

door

Iris Postmus

geboren te Sneek
in 1986

Promotiecommissie

Promotoren: Prof. Dr. J.W. Jukema

Prof. Dr. R.G.J. Westendorp

Co-promotoren: Dr. S. Trompet

Dr. A.J.M de Craen

Overige leden: Prof. Dr. H.J. Guchelaar

Prof. Dr. F.R. Rosendaal

Prof. Dr. Y.T. van der Schouw (University Medical Center Utrecht)

Contents

Chapter 1	General introduction and outline of this thesis	7
Chapter 2	Pharmacogenetics of statins: achievements, whole-genome analyses and future perspectives	13
Chapter 3	Replication of LDL GWAs hits in PROSPER/PHASE as validation for future (pharmaco)genetic analyses	31
Chapter 4	Pharmacogenetic meta-analysis of genome-wide association studies of LDL cholesterol response to statins	43
Chapter 5	In search for genetic determinants of clinically meaningful differential cardiovascular event reduction by pravastatin in the PHARmacogenetic study of Statins in the Elderly at risk (PHASE)/PROSPER study	73
Chapter 6	Non-response to statin therapy: The importance of distinguishing non-responders from non-adherers in pharmacogenetic studies	91
Chapter 7	Statins work around the world	107
Chapter 8	LDL cholesterol still a problem at old age? A Mendelian randomization study	113
Chapter 9	PCSK9 SNP rs11591147 is associated with low cholesterol levels but not with cognitive performance or noncardiovascular clinical events in an elderly population	129
Chapter 10	Main findings and general discussion	143
	Nederlandse samenvatting	152
	List of publications	159
	Curriculum Vitae	163
	Dankwoord	165
