PhD thesis Leiden University. An electronic version of this dissertation is available at <https://openaccess.leidenuniv.nl>

The thesis printed by GVO printers & designers B.V.

The research presented in this thesis was supported by the Netherlands Organization for Scientific Research (NWO, grant no. 819.01.012).

Contents

Nederlandse Samenvatting	7
Chapter 1 Introduction and Summary	13
Chapter 2 A cybertaxonomic revision of the micro-landsnail genus <i>Plectostoma</i> Adam (Mollusca, Caenogastropoda, Diplommatinidae), from Peninsular Malaysia, Sumatra and Indochina	19
Chapter 3 On growth and form of a heteromorphic terrestrial snail: <i>Plectostoma concinnum</i> (Fulton, 1901) (Mollusca: Caenogastropoda: Diplommatinidae)	113
Chapter 4 A method for quantifying, visualising, and analysing gastropod shell form	137
Chapter 5 Association between shell morphology of micro-land snails (genus <i>Plectostoma</i>) and their predator's predatory behaviour	165
Chapter 6 An ontogenetic perspective on the evolution of shell size and shell shape in the land snail genus <i>Plectostoma</i>	195
References	217
Curriculum Vitae	245
