# PLATELET REACTIVITY AND CARDIOVASCULAR EVENTS

PROEFSCHRIFT

ter verkrijging van  
de graad van Doctor aan de Universiteit Leiden,  
op gezag van Rector Magnificus prof. mr. P.F. van der Heijden,  
volgens besluit van het College voor Promoties  
te verdedigen op woensdag 16 februari 2011  
klokke 16.15 uur

door

*Jacob Daniël Snoep*

geboren te Rotterdam  
in 1984

## PROMOTIECOMMISSIE

Promotor: Prof. dr. F.R. Rosendaal

Copromotor: Dr. J.G. van der Bom

Oveige leden: Prof. dr. Ph.G. de Groot (Universiteit Utrecht)

Prof. dr. J.W. Jukema

Dr. M.V. Huisman

The work described in this thesis was performed at the departments of Clinical Epidemiology and Internal Medicine/Endocrinology, section Vascular Medicine, Leiden University Medical Center, Leiden, the Netherlands.

Studies published in this thesis were supported by grants from the Netherlands Heart Foundation (grants 92.345, 97.063 and 2003B248) and the Leducq Foundation, Paris, France for the development of Transatlantic Networks of Excellence in Cardiovascular Research (grant 04 CVD 02).

Financial support for the publication of this thesis by the J.E. Jurriaanse Foundation, Accumetrics Inc., AstraZeneca BV, Beckman Coulter Nederland BV, Corgenix Medical Corporation, GlaxoSmithKline BV, Kordia BV, MSD, NovoNordisk BV, Roche Diagnostics Nederland BV, Servier Nederland Farma BV, and Siemens Healthcare Diagnostics is gratefully acknowledged.

## CONTENTS

Chapter 1	General introduction	9
Chapter 2	Prevalence of persistent platelet reactivity despite use of aspirin: A systematic review	19
Chapter 3	Association of laboratory-defined aspirin resistance with a higher risk of recurrent cardiovascular events: A systematic review and meta-analysis	31
Chapter 4	Clopidogrel non-responsiveness in patients undergoing percutaneous coronary intervention with stenting: A systematic review and meta-analysis	47
Chapter 5	Platelet reactivity in patients with stable cardiovascular disease: Correlation between different tests and association with subject characteristics	65
Chapter 6	Platelet reactivity and recurrent cardiovascular events in patients with stable cardiovascular disease using aspirin: a head-to-head comparison of different tests	89
Chapter 7	High basal platelet reactivity is associated with myocardial infarction in premenopausal women: A population-based case-control study	109
Chapter 8	The T13254C-allele of <i>GP6</i> is associated with decreased platelet activation and a reduced risk of recurrent cardiovascular events and mortality	125
Chapter 9	Time-dependent effects of low-dose aspirin on plasma renin activity, aldosterone, cortisol and catecholamines	141
Chapter 10	General discussion and summary	157
Addendum	Samenvatting	173
	Dankwoord	177
	Publicatielijst	179
	Curriculum Vitae	181
