Transcriptomic studies in human ageing and longevity

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof. Mr. C.J.J.M. Stolker,
volgens besluit van het College van Promotores
te verdedigen op donderdag 19 december 2013
klokke 13:45 uur

door

Willemijn Marie-Antoinette Passtoors
Geboren te Haarlem
in 1980

Promotiecommissie

Promotor: Prof. Dr. P.E. Slagboom

Co-promotores: Dr. M. Beekman

Dr. J.M. Boer
Erasmus University Medical Center

Overige leden: Prof. Dr. C. Franceschi
University of Bologna, Italy

Prof. Dr. A.G. Uitterlinden
Erasmus University Medical Center

Prof. Dr. B.J. Zwaan
Wageningen University

Content

Chapter 1	General introduction	7
Chapter 2	Genomic studies in ageing research: the need to integrate genetic and gene expression approaches	13
Chapter 3	Transcriptional profiling of human familial longevity indicates a role for <i>ASF1A</i> and <i>IL7R</i>	37
Chapter 4	<i>IL7R</i> gene expression network associates with human familial longevity	61
Chapter 5	Gene expression analysis of mTOR pathway: association with human longevity	81
Chapter 6	The association of mTOR and familial longevity in the blood transcriptome is not reflected in primary skin fibroblasts	101
Chapter 7	Meta-analysis on blood transcriptomic studies identifies consistently co-expressed PPI modules as robust markers of human ageing	115
Chapter 8	General discussion	139
Chapter 9	Summary	149
Chapter 10	Nederlandse samenvatting	155
	Curriculum Vitae	163
	List of publications	165
