The interplay between cholesterol and inflammation in the evolution of atherosclerosis

PROEFSCHRIFT

ter verkrijging van

de graad van Doctor aan de Universiteit Leiden,

op gezag van Rector Magnificus prof. mr. P.F. van der Heijden,

volgens besluit van het College voor Promoties

te verdedigen op donderdag 22 januari 2009

klokke 15.00 uur

door

Laurens Verschuren

geboren te Klundert

in 1978

Promotiecomissie

Promotor: Prof. Dr. J.H. van Bockel

Co-Promotores: Dr. R. Kleemann
Dr. T. Kooistra

Referent: Prof. Dr. R. Witkamp (Wageningen Universiteit)

Overige leden: Prof. Dr. P. Quax
Prof. Dr. V.W.M. van Hinsbergh (VUMC)
Dr. J.H.N. Lindeman

The research described in this thesis was supported by a grant of the Netherlands Heart Foundation (NHF-2002B102)

The studies presented in this thesis were performed at the Gaubius Laboratory, TNO- Quality of Life, Leiden, the Netherlands.

Financial support by the Netherlands Heart Foundation for the publication of this thesis is gratefully acknowledged.

Obstakels is dat wat je ziet als je niet gericht bent op je doel!

Table of contents

Chapter 1 : General Introduction	7
Chapter 2 : Atherosclerosis and liver inflammation induced by increased dietary cholesterol intake: a combined transcriptomics and metabolomics analysis. <i>Genome Biology</i> 2007; 8 (9): R200	27
Chapter 3 : Evidence for anti-inflammatory activity of statins and PPAR α -activators in human C-reactive protein transgenic mice <i>in vivo</i> and in cultured human hepatocytes <i>in vitro</i> . <i>Blood</i> . 2004 Jun 1;103 (11):4188-4194	55
Chapter 4 : Fenofibrate reduces atherogenesis in ApoE*3Leiden mice: evidence for multiple anti-atherogenic effects besides lowering plasma cholesterol. <i>Atherosclerosis, Thrombosis, and Vascular Biology</i> 2006 Oct;26 (10):2322-2330	75
Chapter 5 : Effect of low dose atorvastatin versus diet-induced cholesterol-lowering on atherosclerotic lesion progression and inflammation in ApoE*3Leiden transgenic mice. <i>Atherosclerosis, Thrombosis, and Vascular Biology</i> 2005 Jan;25 (1):161-167	95
Chapter 6 : LXR agonist suppresses atherosclerotic lesion development and promotes lesion regression in ApoE*3Leiden mice at several levels. <i>Journal of Lipid Research</i> 2009 Jan	111
Chapter 7 : MIF deficiency reduces inflammatory state and impairs development of insulin resistance and associated atherosclerotic disease. Submitted	135
Chapter 8 : Up-regulation and co-expression of MIF and matrix metalloproteinases in human abdominal aortic aneurysms. <i>Antioxidants and Redox Signaling</i> 2005 Sep-Oct;7 (9-10):1195-1202	165
Chapter 9 : Summary and general discussion	181
Nederlandse samenvatting	195
List of publications	203
Curriculum Vitae	205
