Cover illustration: Photo taken near Albertville, France, it represents the rapid stream in which the immunodiagnosis of tuberculosis has been the last few years.

Cover desing by Hans Ferket and Gildeprint Drukkerijen.

Layout and Printing: Gildeprint Drukkerijen – Enschede, The Netherlands.

The research presented in this thesis was performed at the Department of Infectious Diseases, Leiden University Medical Center, Leiden, The Netherlands.

The work described in this thesis was in part financially supported by grants from the Royal Netherlands Academy of Arts and Science, het Praeventiefonds (currently ZonMW), the Dutch Ministry of Defense and the Rozenboom-Bakhuizen Stichting.

Publication of this thesis was financially supported by KNCV Tuberculosis Foundation, Cellestis and BD Biosciences.

IMMUNODIAGNOSIS OF LATENT TUBERCULOSIS

NEW ANSWERS TO AN OLD QUESTION?

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit van Leiden,
op gezag van Rector Magnificus prof.mr. van der Heijden,
volgens besluit van het College voor Promoties
te verdedigen op woensdag 10 juni 2009
klokke 13:45 uur

door

Willeke (Wilhelmina) Petronella Josephine Franken

geboren te Anna Paulowna
in 1981

Promotie commissie

Promotor:

Prof. Dr. J.T. van Dissel

Co-promotor:

Dr. S.M. Arend

Overige leden:

Prof. Dr. T.H.M. Ottenhoff

Prof. Dr. K. Rabe

Prof. Dr. M.W. Borgdorff (Universiteit van Amsterdam)

Prof. Dr. C. Kallenberg (Universiteit van Groningen)

Table of contents

Chapter 1	Introduction & outline of the thesis	9
Chapter 2	Comparison of Mantoux and QuantiFERON TB Gold tests for diagnosis of latent tuberculosis infection in Army personnel.	25
Chapter 3	Summary of article "comparison of two interferon- γ release assays and tuberculin skin test for tracing tuberculosis contacts	37
Chapter 4	Interferon-gamma release assays during follow-up of tuberculin skin test positive contacts	65
Chapter 5	Follow-up study of tuberculosis-exposed supermarket customers with negative tuberculin skin test results in association with positive gamma interferon release assay results.	85
Chapter 6	Interferon- γ release assays in immigrant contacts and effect of remote exposure to tuberculosis	95
Chapter 7	Predictive value of IGRA and TST for development of active tuberculosis among recently exposed immigrants	115
Chapter 8	Variation in T-SPOT.TB interpretation among independent observers of different laboratories	139
Chapter 9	Diluting samples with high QuantiFERON-TB Gold in-tube results	151
Chapter 10	Qualitative differences in immune responses between cured TB patients and latently infected individuals	155

Chapter 11	Double-blind randomized Phase I study comparing rdESAT-6 to tuberculin as skin test reagent in the diagnosis of tuberculosis infection.	177
Chapter 12	Summary and general discussion	203
	Nederlandse samenvatting en algemene discussie	237
	Curriculum Vitae	233
	Publications	235
	Abbreviations	237
