Stratum corneum hydration

Mode of action of moisturizers on a molecular level

Julia Caussin

The investigations described in this thesis were performed at the Division of Drug Delivery Technology of the Leiden/Amsterdam Center for Drug Research, Leiden University, Leiden, The Netherlands and were financially supported by ICI Ltd, London, United Kingdom.

Stratum corneum hydration

Mode of action of moisturizers on a molecular level

Proefschrift

ter verkrijging van

de graad van Doctor aan de Universiteit Leiden,

op gezag van Rector Magnificus prof.mr. P.F. van der Heijden,

volgens besluit van het College voor Promoties

te verdedigen op woensdag 17 juni 2009

klokke 13.45 uur

door

Julia Caussin

geboren te Hamburg, Duitsland

in 1976

Promotiecommissie

Promotor:	Prof. dr. J. A. Bouwstra
Referent:	Prof. A. C. Williams, Ph.D. (University of Reading)
Overige leden:	Prof. dr. M. Danhof
	Prof. dr. W. Jiskoot
	Prof. dr. J. A. Killian (Universiteit Utrecht)
	Dr. A. P.M. Lavrijsen

Table of Contents

Chapter 1:
Skin, dry skin and moisturization 7

Chapter 2:
Methods used in this Thesis 23

Chapter 3:
This Thesis 31

Chapter 4:
Lipophilic and hydrophilic moisturizers show different actions on human skin as revealed by cryo scanning electron microscopy 35

Chapter 5:
Lipid organization in human and porcine stratum corneum differs widely, while lipid mixtures with porcine ceramides model human stratum corneum lipid organization very closely 53

Chapter 6:
In vivo and in vitro interaction of lipophilic moisturisers with stratum corneum lipids 81

Chapter 7:
FTIR studies show lipophilic moisturizers to interact with stratum corneum lipids, rendering the more densely packed 103

Chapter 8:
Hydrophilic and lipophilic moisturizers have similar penetration profiles but different effects on SC water distribution in vivo 123

Chapter 9:
Summary and Future Perspectives 141

Chapter 10:
Samenvatting 155
