Author: Sirichamorn, Yotsawate

Title: Systematics and biogeography of Aganope, Brachypterus and Derris (Fabaceae) in Asia

Issue Date: 2013-11-28

Curriculum Vitae

Yotsawate Sirichamorn was born on 18 October 1981 in Chon Buri province, Thailand. He finished his secondary education at Traim Udom Suksa School, Bangkok, in 2000. He studied at Chulalongkorn University, Bangkok, and obtained his Bachelor degree of Sciences, and received first class honors in the field of Botany in 2004 and then a Master of Sciences degree in the same field of study in 2007. Yotsawate has been interested in biodiversity, especially in plant diversity, since he was very young. During his study at Chulalongkorn University, he was granted a scholarship of the Development and Promotion of Science and technology Talents (DPST) project. Yotsawate chose systematic botany as his major. During his Master study, Yotsawate gained his first work experience as a teaching assistant in many botanical subjects for Bachelor-degree students, for example, Plant taxonomy, Plant morphology, Economic plants and Plants for better life. He also participated in the “Little Botanist” project for primary school students, organized by Chulalongkorn University Demonstration Elementary School. Yotsawate received the Academic Excellence Award for the outstanding science student in Botany from the Professor Dr. Tab Nilanidhi Foundation in 2007. After his Masters degree, he worked as a research assistant at Professor Kasin Suwattapan Herbarium, Department of Botany, Chulalongkorn University for a year. His interest in Leguminosae and pteridophytes was inspired by Prof. Dr. Thaweesakdi Boonkerd, who was his first thesis supervisor. In 2008, Yotsawate was granted a scholarship for biodiversity studies by the Thailand office of the Higher Education Commission. He started his Ph.D at the National Herbarium of the Netherlands, Leiden University, under the supervision of Prof. Dr. Peter C. van Welzen and Dr. Frits A.C.B. Adema. During his study in Leiden University he assisted in the Tropical Plant Families course for MSc students and also gave lectures on the plant families Burseraceae, Lamiaceae and Myrtaceae. After his graduation he will continue his career as a lecturer at the department of Biology, Faculty of Sciences, Silpakorn University, Sanamchandra Palace Campus, Nakhon Pathom province, Thailand.

Sirichamorn, Y., Adema, F.A.C.B. and van Welzen, P.C. 2013. (2121) Proposal to conserve the name *Brachypterus* against *Solori* (Fabaceae). *Taxon* 62: 179–180.

Acknowledgements

I would like to express my gratitude to the Office of the Higher Education Commission and Royal Thai Government for the financial support of my research.

During my fieldwork I was assisted by Dr. Winai Somprasong, head of Bangkok Herbarium, Bob Harwood, Yutthana Tongboonkuea and Dr. Charan Leeratiwong. My sincere thanks are extended to all staffs and curators of BCU, BK, BKF, CMU, K, L, P and WAG for providing laboratory facilities, specimen loans, and various kinds of support. I like to mention Anita Walsmit Sachs for her beautiful illustrations; Marcel Eurlings for his molecular lab training; Natasha Schildo, René Glas and all technicians at the Sylvius Laboratory for assistance; Brigitte Duijffes and Willem de Wilde, my aunt and uncle abroad, for their kindness, hospitality and much help.

Many thanks go to my Thai and foreign friends from Naturalis and other institutions: Kanchana Pruesapan, Piya Temviriyankul, Tanawat Chaowasku, Marc Appelhans, Svenja Meinke, Dome and Saranyapin Potikanond, Bhanumas Chantarasuwan, Narongsak Kidsom, Naovarat van Welzen, Sungwan Klaassen, Nor Yahaya, Annick Lang, Judith Aiglsperger, Constantijn Mennes, Rodrigo Cámara, Nicolas Davin, Patrick Henriksson and Mega Atria.

I gratefully acknowledge Prof.dr. Thaweesakdi Boonkerd, my first supervisor in Thailand, who raised my interest in taxonomic studies of legumes, and Dr. Tosak Seelanan, my first teacher in molecular phylogenetics and lab works. I am grateful to Dr. Hu Jer-Ming for his very informative work on the molecular systematics of the Millettiaeae.

I like to express my deepest gratitude to my parents and younger sister for all the support, love, understanding and encouragement they have given me.

Finally, I like to dedicate this thesis to the memory of Dr. Robert (Rob) Geesink (1945-1992), who devoted himself to the study of the complex leguminous tribe, the Millettiaeae. His publications provide valuable information for all legume taxonomists for many generations to come.
