Acknowledgements

In the winter of 1983-84 a group of students, led by professor L.P. Louwe Kooijmans, began to list the extensive collection of the Heemkunde Vereniging Roerstreek. Milco Wansleeben and I discovered we could work together very well and as a result we would collaborate often in the latter part of our studies. Our specific talents were highly complementary. Milco was first and foremost in using computers and statistical and spatial analysis, as testified by his undergraduate thesis on the Mesolithic and Neolithic habitation of the Roerstreek¹. I myself focused mainly on the Mesolithic and Neolithic and the application of ethnographic data in archaeology. Our prolonged co-operation led to a joint proposal for doctoral research in 1988. Without Milco's stimulus, critical comments, common sense, energy, ability and our endless discussions, I would never have been able to conduct this study. The gratitude I owe him is hard to express.

Let's return to the 'Tour de France' from the preface, for a more personal approach. A bicycle race cannot exist without an organisation, sponsors, money, team manager, teammates, attendants, local organisations, press and public. The same goes for the Meuse Valley Project. I shall try to mention them all, although chances are some will be overlooked, for which I apologise in advance.

My thanks to all the amateurs and societies that contributed, often substantially, to this dissertation by their investigations, their finds, the boring administration and for making their material and data available to me. Without them this dissertation could not have been written. This dissertation is also proof of the importance of their work, what can be achieved in mutual co-operation and what may yet be achieved in future. I would therefore like to thank:

H. Bekkers (St. Odiliënberg), R. Bloemen (Venray), H. Borst Pauwels (Groesbeek), A. Chambon (Empel), J. Driessens (Venlo), T. Dziurawski (St. Odiliënberg), E. van Geel (Geleen), J. Glaser (Limbricht), M. de Grave (Linne), S. van Hassel (Linden), W. Hendrix (Stein), J. de Jong (Mook), B. Keerweer (Grave), J. Kempkens (Haalen), L. Keuren (Echt), B. Kruysen (Venray), J. Koeling (Cuyk), M. Koolen (Escharen), T. Lupak (Haalen), Father Munsters (†) (Stein), J. Nagengast (Beek), P. Peeters (Reuver), T. van Pol (St. Odiliënberg), D. Reijnen (Boxmeer), J. Schaap

(Geleen), H. Schmitz (Posterholt), T. Stuart (Nijmegen), R. Theunissen (Linne), W. Tuyn (Nijmegen), A. Verhagen (Empel), H. Verscharen (Grave), H. Verscharen (Middelaar), H. Verver (Obbicht), H. Vromen (Geleen), Werkgroep 'Ald Oirlo' (Oirlo) and J. de Wit (Grave).

One name is absent from this list. To Jo Smeets I owe special thanks: he was the one to introduce me to Limburg and the Heemkunde Vereniging Roerstreek in 1984. His knowledge, hospitality, commitment and enthusiasm caused, encouraged and strengthened my interest in and love for (amateur) archaeology and landscape in Limburg. May we testify to this in future.

Many inside the scientific community as well as outside have contributed to the Meuse Valley Project and the realisation of this dissertation. I gratefully acknowledge their support, in particular H. van der Beek (Amersfoort) and R. Isarin (Amsterdam), who from the very start have contributed greatly in the field of geology, as well as J. van Eijck (Leiden), I. Schwartz (Leiden) and M. van Dinter (Utrecht). Prof. dr. C.C. Bakels (Leiden) and W. J. Kuiper (Leiden) and prof. dr. C. R. Janssen (Utrecht) were responsible for the pollen research. Mrs. L.H. van Wijngaarden-Bakker (Amsterdam) analysed the bone finds from the Maaspoort-excavation and L. Smits investigated the human skeletal remains. Paul Hennekens (Maastricht) patiently matched all flint from the Merselo excavation. Drs. O.H. Harsema (Groningen), drs E. Kramer (Leeuwarden), drs. A. Lanting (Groningen), and dr. D. Teunissen (Malden) provided me with unpublished material.

Drs. J.M.W.C. Schatorjé, director, and drs. W. Hupperetz, keeper of the Limburgs Museum, Venlo, provided the opportunity to make an inventory of the finds stored there. R. S. Hulst (Gelderland), W.J.H. Verwers (Noord-Brabant) and H. Stoepker (Limburg), all former provincial archaeologists, gladly lent their support.

Non-scientific support is gratefully acknowledged as well: the Smals firm in Herten (mr. R. Meijnen), the town of Venray, the municipal archives of Venray, the borough of Ambt Montfort and the city of 's-Hertogenbosch. An integral and crucial part of any dissertation is the discussion. Many participated and contributed to clearing up obscurities, rephrasing woolly statements and pointed out

weaknesses. In this context I should like to thank professor R. Bradley (Reading), drs F.T.S. Brounen (Maastricht), dr. Ph. Crombé (Gent), drs. E. Drenth (Amersfoort), dr. H.A. Groenendijk (Groningen), dr. M.J.Th. de Grooth (Maastricht), dr. O. Grøn (Roskilde), drs. J.-W. Hogestijn (Almere), drs. D. de Loecker (Leiden), dr. D. Price (Michigan), dr. E. Rensink (Leiden), professor W. Roebroeks (Leiden), dr. B. Valentin Eriksen (Aarhus), dr. P. van de Velde (Leiden), professor P.M. Vermeersch (Leuven), J.-P. de Warrimont (Geulle) and dr. M. Zvelebil (Sheffield).

Dozens of students assisted in field reconnaissance, core sampling, excavations and collaborated in working up the results. It is impossible to mention them all, but it will be clear they have been invaluable. A special thanks to the following participants in working groups and/or fieldwork: Manon van Diemen, Xavier van Dijk, Ruurd Kok, Sjaak Mooren, Stefan Molenaar, Natasja Moses, Marie-France van Oorsouw, Inez Perreira, Hans Oude Rengering, Patrick Ploegaart, Martijn van Poecke, Serge Polman, Erik Rossenberg, Huub Scholte Lubberink, Maaïke Sier, Ellen Smits, Christo Thanos, Boudewijn Voormolen and Dieke Wesselingh.

Financially I am much indebted to NWO for their support over the period 1988-1992. The province of Noord-Brabant provided funds for the research in 's-Hertogenbosch. The exploratory investigation in Linden was for the most part paid for by the Smals firm in Herten. In addition many municipal departments provided assistance, mostly logistical.

The city of 's-Hertogenbosch provided support for research on the shore of the Noordplas in the Maaspoort area, the town of Venray, in particular J. Renkens and the local fire brigade, provided support for the investigation in Merselo and the borough of Ambt Montfort for the investigation in St. Odiliënberg. My gratitude to all.

I want to thank Hetty Otten-Vogelaar for translating the dissertation, Peter Deunhouwer for the drawings and Peter-Jan Bomhof (RMO) and Jan Pauptit (Faculty of Archaeology, Leiden) for the photographs. Finally I thank my employer, the National Museum of Antiquities, for the willingness and trust in allowing me to start this research although I held no scientific position at the start of the project. I hope this dissertation proves the trust to have been justified.

The time involved in research and writing of this dissertation has taken a heavy personal toll as well. The lengthy and exhausting excavations, the numerous visits — often days on end, often at the most unlikely hours — to amateurs and the many hours of work at night and on weekends have repercussions on family life. The space Petra Otten, Sieger and Victor have always accorded me to realise my love for archaeology is something I treasure and admire deeply. My heartfelt thanks to them.

notes

1 Wansleben 1986.

Curriculum vitae

Leo Verhart werd op 26 januari 1952 geboren te Vlaardingen. Na de lagere technische school (electrotechniek) en middelbare technische school (bouwkunde) werkte hij als bouwkundig tekenaar in Delft en als sociaal cultureel werker in Vlaardingen. In 1977 werd hij als veldtechnicus aangesteld bij het Rijksmuseum van Oudheden en na een avondstudie atheneum startte hij in 1982 met een studie kunstgeschiedenis aan de Rijksuniversiteit Leiden. Na het kandidaats in 1983, werd op 30 juni 1986 het doctoraal examen prehistorie afgelegd. Sinds 1989 is hij werkzaam als conservator prehistorie bij het Rijksmuseum van Oudheden.
