Het onderzoek beschreven in dit proefschrift werd uitgevoerd in het Leids Universitair Medisch Centrum op de afdeling oogheelkunde in samenwerking met de afdeling klinische oncologie.

Education is the great engine to personal development. It is through education that the daughter of a peasant can become a doctor, that the son of a mine worker can become the head of the mine, that the child of farm workers can become the president of a great nation. It is what we make of what we have, not what we are given, that separates one person from another.
