# Contents

Chapter 1	General introduction and outline of the thesis	9
Chapter 2	Do biofilm formation and interactions with human cells explain the clinical success of <i>Acinetobacter baumannii</i> ?	35
Chapter 3	CsuA/BABCDE-dependent pili are not involved in the adherence of <i>Acinetobacter baumannii</i> ATCC19606 <sup>T</sup> to human airway epithelial cells and their inflammatory response	51
Chapter 4	Differences in <i>Acinetobacter baumannii</i> strains and host innate immune response determine morbidity and mortality in experimental pneumonia	65
Chapter 5	The clinical success of <i>Acinetobacter</i> species; genetic, metabolic and virulence attributes	81
Chapter 6	Cryo electron tomographic analysis of membrane vesicle formation by <i>Acinetobacter baumannii</i> ATCC19606 <sup>T</sup> at different growth stages	103
Chapter 7	Three-dimensional human skin equivalent as a tool to study <i>Acinetobacter baumannii</i> colonization	119
Chapter 8	General discussion and summary	135
Chapter 9	Dutch summary (Nederlandse samenvatting)	149
	Curriculum Vitae	155
	List of publications	157
