The publication of this thesis was financially supported by the Dutch Arthritis Foundation (Reumafonds), Abbvie and Pfizer B.V.

Predictive Factors for the Development and Disease Course of Rheumatoid Arthritis

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van de Rector Magnificus prof. Mr. C.J.J.M. Stolker,
volgens het besluit van het College voor Promoties
ter verdediging op 30 oktober 2014
klokke 13:45 uur

door

Annemarie Krabben

geboren te Rotterdam
in 1983

PROMOTIECOMMISSIE:

Promotor:	Prof. dr. T.W.J. Huizinga
Co-promotoren:	Dr. A.H.M. van der Helm-van Mil Dr. M. Reijnierse
Overige leden:	Prof. dr. R.E.M. Toes Prof. dr. W.F. Lems (VUMC, Amsterdam) Prof. dr. ir. B.P.F. Lelieveldt

TABLE OF CONTENTS

1 General introduction 1

PART I UNCLASSIFIED ARTHRITIS AND THE RISK ON DEVELOPMENT OF RHEUMATOID ARTHRITIS

2 Undifferentiated arthritis characteristics and outcomes when applying the 2010 and 1987 criteria for rheumatoid arthritis 19

3 Risk on rheumatoid arthritis development in patients with unclassified arthritis according to the 2010 ACR/EULAR criteria for rheumatoid arthritis 31

PART II GENETIC AND SEROLOGIC FACTORS IN PREDICTING RADIOGRAPHIC PROGRESSION IN RHEUMATOID ARTHRITIS

4 Biomarkers for radiographic progression in rheumatoid arthritis 47

5 Genetic variants in *IL15* associated with progression of joint destruction in rheumatoid arthritis, a multi cohort study 97

6 Association of genetic variants in the *IL4* and *IL4R* genes with the severity of joint damage in rheumatoid arthritis: a study in seven cohorts 113

7 A genetic variant in *Granzyme-B* is associated with progression of joint destruction in rheumatoid arthritis 133

8 Serum pyridinoline levels and prediction of severity of joint destruction in rheumatoid arthritis 149

PART III MRI IN PATIENTS WITH ARTHRALGIA AND EARLY ARTHRITIS

9 Magnetic resonance imaging of hand and foot joints of patients with ACPA positive arthralgia without clinical arthritis 161

10 Concordance between inflammation at physical examination and on MRI in early arthritis patients 175

11 MRI detected subclinical joint inflammation is associated with radiographic progression 199

12 Are rheumatoid arthritis patients discernible from other early arthritis patients using 1.5T extremity MRI? a large cross-sectional study 219

PART IV MRI scan protocol revisited

13	Aiming for a shorter rheumatoid arthritis MRI protocol: can contrast-enhanced MRI replace T2 for the detection of bone marrow oedema?	237
14	Aiming for a shorter scanning protocol in early arthritis MRI: can gadolinium contrast administration be eliminated?	251
15	Effect of wearing high-heels on the forefoot: a MRI evaluation	267
16	Summary and general conclusion	273
	Nederlandse samenvatting	293
	Dankwoord	307
	Curriculum Vitae	311
	List of publications	313
