## **Proefschrift**

ter verkrijging van  
de graad van Doctor aan de Universiteit van Leiden,  
op gezag van Rector Magnificus prof. mr. P.F. van der Heijden,  
volgens besluit van het College voor Promoties  
te verdedigen op donderdag 18 december 2008  
klokke 16.15 uur

door

**Maureen Marit Henneman**

geboren te Utrecht  
1979

## Promotiecommissie

Promotores: Prof. dr. J.J. Bax  
Prof. dr. J.W. Jukema

Co-promotor: Mw. dr. J.D. Schuijf

Referent: Prof. dr. P.J. de Feyter (Erasmus Medisch Centrum, Rotterdam)

Overige leden: Prof. dr. E.E. van der Wall  
Prof. dr M.J. Schalijs  
Prof. dr. B.L.F. van Eck-Smit (Academisch Medisch Centrum, Amsterdam)  
Dr. M.P.M. Stokkel

Financial support by the Netherlands Heart Foundation and the Interuniversity Cardiology Institute of the Netherlands for the publication of this thesis is gratefully acknowledged.

# Table of contents

|  |            |
|--|------------|
| General introduction and outline of the thesis   | 9          |
| <b>Part I</b> Detection and evaluation of coronary artery disease with multi-slice computed tomography   | <b>15</b>  |
| <b>Chapter 1</b> Non-invasive anatomical and functional imaging for the detection of coronary artery disease<br>Br Med Bull 2006;79-80:187-202   | <b>17</b>  |
| <b>Chapter 2</b> Global and regional left ventricular function: a comparison between gated single photon emission computed tomography, 2D echocardiography and multi-slice computed tomography<br>Eur J Nucl Med Mol Imaging 2006;33:1452-60           | <b>33</b>  |
| <b>Chapter 3</b> Assessment of global and regional left ventricular function and volumes with 64-slice multi-slice computed tomography: a comparison with 2D echocardiography<br>J Nucl Cardiol 2006;13:480-7  | <b>49</b>  |
| <b>Chapter 4</b> Comprehensive cardiac assessment with multi-slice computed tomography: evaluation of left ventricular function and perfusion in addition to coronary anatomy in patients with previous myocardial infarction<br>HEART 2006;92:1779-83 | <b>63</b>  |
| <b>Chapter 5</b> Comparison of multi-slice computed tomography to gated single photon emission computed tomography for imaging of healed myocardial infarcts<br>Am J Cardiol 2008;101:144-8  | <b>75</b>  |
| <b>Chapter 6</b> Non-invasive evaluation with multi-slice computed tomography in suspected acute coronary syndrome: plaque morphology on multi-slice computed tomography versus coronary calcium score<br>J Am Coll Cardiol 2008;52:216-22             | <b>87</b>  |
| <b>Chapter 7</b> Multi-slice computed tomography coronary angiography for ruling out suspected coronary artery disease: what is the prevalence of a normal study in a general clinical population?<br>Eur Heart J 2008;29:2006-13                      | <b>101</b> |

|                   |   |            |
|-------------------|---|------------|
| <b>Part II</b>    | Role of nuclear imaging in the evaluation of heart failure  | <b>119</b> |
| <b>Chapter 8</b>  | Nuclear imaging in cardiac resynchronization therapy<br>J Nucl Med 2007;48:2001-10  | <b>121</b> |
| <b>Chapter 9</b>  | Phase analysis of gated myocardial perfusion single photon emission<br>computed tomography compared to tissue Doppler imaging for the<br>assessment of left ventricular dyssynchrony<br>J Am Coll Cardiol 2007;49:1708-14             | <b>139</b> |
| <b>Chapter 10</b> | Can left ventricular dyssynchrony as assessed with phase analysis on gated<br>myocardial perfusion single photon emission computed tomography predict<br>response to cardiac resynchronization therapy?<br>J Nucl Med 2007;48:1104-11 | <b>151</b> |
|                   | <b>Summary and conclusions</b>  | <b>167</b> |
|                   | <b>Samenvatting en conclusies</b>   | <b>171</b> |
|                   | <b>List of publications</b>   | <b>177</b> |
|                   | <b>Dankwoord</b>  | <b>181</b> |
|                   | <b>Curriculum vitae</b>   | <b>185</b> |
