Financial support to the costs associated with the publication of this thesis from AstraZeneca BV, Biotronik Nederland BV, Boehringer Ingelheim BV, Boston Scientific BV, Bristol-Myers Squibb BV, Eli Lilly Nederland BV, GE Healthcare Medical Diagnostics, J.E. Jurriaanse Stichting, Medtronic Trading NL BV, Menarini Farma Nederland, Merck Sharp & Dohme BV, Novartis Pharma BV, Pfizer BV, Schering-Plough BV, Servier Farma BV, St. Jude Medical Nederland BV, Stichting EMEX and Toshiba Medical Systems Nederland is gratefully acknowledged.

Multimodality imaging in chronic coronary artery disease

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit van Leiden,
op gezag van Rector Magnificus prof. mr. P.F. van der Heijden,
volgens besluit van het College voor Promoties
te verdedigen op donderdag 18 december 2008
klokke 16.15 uur

door

Maureen Marit Henneman

geboren te Utrecht
1979

Promotiecommissie

Promotores: Prof. dr. J.J. Bax
Prof. dr. J.W. Jukema

Co-promotor: Mw. dr. J.D. Schuijf

Referent: Prof. dr. P.J. de Feyter (Erasmus Medisch Centrum, Rotterdam)

Overige leden: Prof. dr. E.E. van der Wall
Prof. dr M.J. Schalijs
Prof. dr. B.L.F. van Eck-Smit (Academisch Medisch Centrum, Amsterdam)
Dr. M.P.M. Stokkel

Financial support by the Netherlands Heart Foundation and the Interuniversity Cardiology Institute of the Netherlands for the publication of this thesis is gratefully acknowledged.

Voor mijn ouders

Table of contents

General introduction and outline of the thesis	9
Part I Detection and evaluation of coronary artery disease with multi-slice computed tomography	15
Chapter 1 Non-invasive anatomical and functional imaging for the detection of coronary artery disease Br Med Bull 2006;79-80:187-202	17
Chapter 2 Global and regional left ventricular function: a comparison between gated single photon emission computed tomography, 2D echocardiography and multi-slice computed tomography Eur J Nucl Med Mol Imaging 2006;33:1452-60	33
Chapter 3 Assessment of global and regional left ventricular function and volumes with 64-slice multi-slice computed tomography: a comparison with 2D echocardiography J Nucl Cardiol 2006;13:480-7	49
Chapter 4 Comprehensive cardiac assessment with multi-slice computed tomography: evaluation of left ventricular function and perfusion in addition to coronary anatomy in patients with previous myocardial infarction HEART 2006;92:1779-83	63
Chapter 5 Comparison of multi-slice computed tomography to gated single photon emission computed tomography for imaging of healed myocardial infarcts Am J Cardiol 2008;101:144-8	75
Chapter 6 Non-invasive evaluation with multi-slice computed tomography in suspected acute coronary syndrome: plaque morphology on multi-slice computed tomography versus coronary calcium score J Am Coll Cardiol 2008;52:216-22	87
Chapter 7 Multi-slice computed tomography coronary angiography for ruling out suspected coronary artery disease: what is the prevalence of a normal study in a general clinical population? Eur Heart J 2008;29:2006-13	101

Part II	Role of nuclear imaging in the evaluation of heart failure	119
Chapter 8	Nuclear imaging in cardiac resynchronization therapy J Nucl Med 2007;48:2001-10	121
Chapter 9	Phase analysis of gated myocardial perfusion single photon emission computed tomography compared to tissue Doppler imaging for the assessment of left ventricular dyssynchrony J Am Coll Cardiol 2007;49:1708-14	139
Chapter 10	Can left ventricular dyssynchrony as assessed with phase analysis on gated myocardial perfusion single photon emission computed tomography predict response to cardiac resynchronization therapy? J Nucl Med 2007;48:1104-11	151
	Summary and conclusions	167
	Samenvatting en conclusies	171
	List of publications	177
