Author: Diepen, Hester Catharina van

Title: Retinal and neuronal mechanisms of circadian photoreception

Issue Date: 2015-09-10

Retinal and neuronal mechanisms of circadian photoreception

Hester van Diepen

The research described in this thesis was financially supported by The Wellcome Trust, United Kingdom

ISBN: 978-90-9029118-5

The printing of this thesis was financially supported by:
SOLG (Stichting voor Onderzoek naar Licht en Gezondheid)
Stichting Leids Oogheekundig Ondersteuningsfonds
Avantes

Layout and printing: Off Page

Cover design: Esmee Gramberg, www.annageemag.com

The cover reflects a schematic rest-activity rhythm of a mouse shown in spectral colors

Retinal and neuronal mechanisms of circadian photoreception

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof.mr. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op donderdag 10 september 2015
klokke 15.00 uur

door Hester Catharina van Diepen

geboren te Wageningen
in 1985

PROMOTIECOMMISSIE:

Promotores: Prof. Dr. J.H. Meijer
Prof. Dr. R.G. Foster (Oxford University, United Kingdom)

Overige leden: Prof. Dr. A.P. Ijzerman (Leiden Academic Centre for Drug Research,
Leiden University)
Dr. T. de Boer
Dr. M.J. van Osch

TABLE OF CONTENTS

Chapter 1	General introduction	7
Chapter 2	Circadian photoreception: from phototransduction to behaviour <i>The Retina and Circadian Rhythms, Springer Series in Vision Research 2013</i>	23
Chapter 3	Ultraviolet light provides a major input to non-image forming light detection in mice <i>Current Biology 2012, 22, 1397-1402</i>	49
Chapter 4	Irradiance encoding in the suprachiasmatic nuclei by rod and cone photoreceptors <i>FASEB Journal 2013, 22, 1397-1402</i>	73
Chapter 5	Contribution of cones to the light response of the mammalian biological clock <i>In preparation</i>	93
Chapter 6	Caffeine increases light responsiveness of the mouse circadian pacemaker <i>The European Journal of Neuroscience 2014, 40, 3504-3511</i>	107
Chapter 7	Role of vasoactive intestinal peptide in the light input to the circadian system <i>The European Journal of Neuroscience 2015, Epub 2015 Apr 17</i>	125
Chapter 8	The amplitude of the SCN electrical activity rhythm is enhanced by exercise <i>Scientific reports, under revision</i>	153
Chapter 9	General discussion	167
	Summary	183
	Samenvatting	187
	Dankwoord	191
	List of publications	193
	Curriculum vitae	195
