The research described in this thesis was performed at the Laboratory for pediatric immunology, hematology, oncology and stemceltransplantation of the Leiden University Medical Center, Leiden, the Netherlands. This study was supported by a grant from KIKA, Dutch Children Cancer-Free Foundation (Grant 38). The printing of this thesis was financially supported by BD Biosciences and ABN-AMRO.

for Pediatric Oncology/Hematology*

# Contents

Chapter 1. General introduction and aims of this thesis	7
Chapter 2. Mesenchymal stromal cells isolated from children with systemic juvenile idiopathic arthritis suppress innate and adaptive immune responses, <i>Cytotherapy</i> , 2013	23
Chapter 3. Despite differential gene expression profiles pediatric MDS derived mesenchymal stromal cells display functionality <i>in vitro</i> , <i>Stem Cell Research</i> , 2015	39
Chapter 4. Gene-expression and <i>in vitro</i> function of mesenchymal stromal cells are affected in Juvenile Myelomonocytic Leukemia, <i>Haematologica</i> , 2015	65
Chapter 5. Gastrointestinal acute graft-versus-host disease in children: histology for diagnosis, mesenchymal stromal cells for treatment and biomarkers for prediction of the response, <i>Biology of Blood and Marrow Transplantation</i> , 2014	95
Chapter 6. Mesenchymal stromal cell therapy is associated with increased adenovirus-associated but not cytomegalovirus-associated mortality in children with severe acute graft-versus-host disease, <i>Stem Cells Translational Medicine</i> , 2014	119
Chapter 7. General discussion and future perspectives	143
Samenvatting	161
Chapter 8. References	167
Chapter 9. Dankwoord	189
Curriculum vitae	193
List of publications	195
