Title: Determinants and consequences of long-term benzodiazepine use

Date: 2012-12-06

Determinants and Consequences of long-term Benzodiazepine Use

Leonie Manthey

The infrastructure for the NESDA study (www.nesda.nl) is funded through the Geestkracht program of the Netherlands Organisation for Health Research and Development (ZonMw, grant number 10-000-1002) and is supported by participating universities and mental health care organizations (VU University Medical Centre, GGZ inGeest, Arkin, Leiden University Medical Centre, GGZ Rivierduinen, University Medical Centre Groningen, Lentis, GGZ Friesland, GGZ Drenthe, Scientific Institute for Quality of Health Care [IQ Healthcare], Netherlands Institute for Health Services Research [NIVEL] and Netherlands Institute of Mental Health and Addiction [Trimbos]). Data analyses were supported by a Netherlands Organisation for Scientific Research (NWO) grant (VIDI 917.66.320) to prof.dr. B.W.J.H. Penninx.

Financial support for the printing of this thesis was kindly provided by Ulrike & Uwe Manthey.

Determinants and Consequences of long-term Benzodiazepine Use

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
