The Phonology of Shaoxing Chinese

PROEFSCHRIFT

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van de Rector Magnificus Dr. D.D. Breimer,
hoogleraar in de faculteit der Wiskunde en
Natuurwetenschappen en die der Geneeskunde,
volgens besluit van het College voor Promoties
te verdedigen op dinsdag 31 januari 2006
klokke 15.15 uur

door

JISHENG ZHANG

geboren te Shaoxing, China
in 1955

| Acknowledgements | xi |
| 1 Background | 1 |
| 1.1 Introduction | 1 |
| 1.2 Methodology | 3 |
| 1.3 Syllable Theory | 4 |
| 1.3.1 Onset-Rhyme models | 5 |
| 1.3.2 Dependency and Government Phonology..... | 6 |
| 1.3.3 Moraic models..... | 8 |
| 1.4 Tone Theory | 9 |
| 1.4.1 Tone features..... | 10 |
| 1.4.2 Register features..... | 12 |
| 1.5 Data | 15 |
| 1.6 Organization | 15 |
| 2 The Consonants and Vowels of Shaoxing: Surface Representations | 17 |
| 2.1 Introduction | 17 |
| 2.2 Initials..... | 18 |
| 2.2.1 Stops | 18 |
| 2.2.2 Glottal stop | 21 |
| 2.2.3 Affricates..... | 24 |
| 2.2.4 Fricatives | 28 |
| 2.2.5 The sonorants | 32 |
| 2.3 Finals | 38 |
| 2.3.1 Final inventory | 39 |
| 2.3.2 Syllabic consonants | 44 |
| 2.3.2.1 Rules of syllabicity..... | 44 |
| 2.3.2.2 Weight-by-stress | 46 |
| 2.3.3 Vowels..... | 51 |
| 2.3.3.1 Apical vowel | 53 |
| 2.3.3.2 Other vowels | 57 |
| 2.3.4 Vowel nasalization | 58 |
| 2.3.5 Complex Finals | 61 |

| | | |
|----------|---|------------|
| 2.3.5.1 | GV | 61 |
| 2.3.5.2 | VV | 64 |
| 2.3.5.3 | VC | 67 |
| 2.3.5.4 | GVC | 68 |
| 2.4 | Phonemic [ʔ] in SX | 70 |

Acknowledgements

Writing this thesis was my life-long ambition, but would never have been accomplished and brought to a favourable conclusion without the help of those to whom I would express my heart-felt thanks.

Leiden regulations forbid me to thank the members of my doctoral committee for their guidance and encouragement from the initial to the final stages of this work and for their critical reading of the manuscript, detailed and extensive comments and instructive and valuable advice.

Prof. Iggy Roca has been an influential scholar in my phonological studies. My visit to him in Colchester in 2003 benefited me a lot, as a result of his profound knowledge and his insightful opinions about phonological theories. Prof. Wang Futang, an expert at dialectology in Beijing University, China, and also a Shaoxing native, helped me through his letters to me, discussing the phonetics of the onset consonants in Shaoxing.

I have profited greatly from discussions in the ULCL phonology group, held every week, which provided everyone with the opportunity to freely and extensively exchange phonological ideas and learn from each other.

I wish to thank also all my colleagues in LUCL (previously ULCL), not only in the phonological and phonetic circles, but also in syntax. Talks with everyone during my stay in Leiden have enriched my linguistic knowledge. Besides, their friendly and considerate help, and good humour, always made me feel at home.

Although I am a native speaker of Shaoxing myself, I have also learned great deal from my family members in Shaoxing and neighbours who helped with data that I could record and collect. I thank them for allowing me to consult them.

My PhD study in Leiden University was privately funded, for which I feel deeply indebted to my family, my wife and my son, who fully understand me and who have given me enormous support during these years.

Many thanks should go to my friends at home and abroad whose constant care and concern helped me to go through these years.

Thanks should also go to my former home university, Ningbo University, China, which made it possible for me to work on my PhD project in Leiden between the intervals of my teaching in Ningbo during these years.

Finally, I wish to thank the China Scholarship Council (CSC), which financially supported my first visit to Leiden University for half a year as a visiting scholar in 2001, which gave me the opportunity to pursue my PhD study in phonology in LUCL.
