TRIAGING EQUIVOCAL CYTOLOGY OF THE CERVIX

Identifying women at risk for high-grade cervical lesions

TRIAGING EQUIVOCAL CYTOLOGY OF THE CERVIX

Identifying women at risk for high-grade cervical lesions

PROEFSCHRIFT

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van de Rector Magnificus Dr. D.D. Breimer,
hoogleraar in de faculteit der Wiskunde en
Natuurwetenschappen en die der Geneeskunde,
volgens besluit van het College voor Promoties
te verdedigen op dinsdag 13 juni 2006
te klokke 16:15 uur

door

Celesta Walburga Maria Wensveen
geboren te Wassenaar
in 1965

Promotiecommissie:

Promotor: Prof. Dr. J.B. Trimbos

Copromotor: Dr. M.J. Kagie

Referent: Prof. Dr. C.W. Burger (ErasmusMC)

Overige Leden: Prof. Dr. G.G. Kenter
Prof. Dr. G.J. Fleuren

Ontwerp omslag en lay-out: Gerard Meijer
Printed by: Aeroset Pre Press bv, Wateringen
ISBN-10: 90-9020685-X
ISBN-13: 978-90-9020685-1

Financial support for the printing of this thesis was provided by
“Olympus Nederland B.V.” and “Tyco Healthcare”.

Jij mag zijn zoals je bent
om te worden wie je bent,
maar nog niet kunt zijn;
en je mag het worden
op jouw manier
en in jouw tijd.

Anna Terruwe

Ter herinnering aan mijn vader en Pablo

Voor mam

CONTENTS

Chapter 1

Introduction	9
1.1 Equivocal cytology	11
1.1.1 Pap II, borderline dyskaryosis, ASCUS/ AGUS	11
1.1.2 Natural history and management of equivocal cytology	12
1.2 Colposcopy	13
1.2.1 Correlation between colposcopic characteristics and histological outcome	13
1.2.2 Inter-observer agreement	14
1.3 Human papillomavirus	16
1.3.1 HPV and other risk factors	16
1.3.2 Epidemiology of genital HPV (natural history)	17
1.3.3 HPV tests	18
1.3.4 Viral Load of HPV	20
1.4 Biomarker Ki-67	21
1.5 Outline of the thesis	22

Chapter 2

Detection of Cervical Intraepithelial Neoplasia in women with Atypical Squamous or Glandular Cells of Undetermined Significance cytology: A prospective study	33
---	----

Chapter 3

Interobserver agreement on interpreting hand-drawings of colposcopy in women with borderline cytology to predict high-grade lesions	45
---	----

Chapter 4

Can viral load, semi-quantitatively evaluated, of human papillomavirus predict cytological or histological outcome in women with atypical squamous or glandular cells of undetermined significance cytology?	53
--	----

Chapter 5

Viral load of human papillomavirus and high-grade cervical intraepithelial neoplasia	65
--	----

Chapter 6

Combining HPV and MIB-1 test reduces the number of colposcopies in women with equivocal borderline cytology	77
---	----

Chapter 7

Discussion and conclusions	87
----------------------------	----

Chapter 8
