The work presented in this thesis could not have been realized without the excellent cooperation of the people of Garu and Farfar area where the field work took place. The hospitality of the villagers and the management of the Garu Health Centre created a pleasant atmosphere for the work to be carried out successfully.

Mr. Albano Bayita, Ms Mathilda Abugri, Mr. Moses Kolan, Mr. Daniel Laar, Mr. John Laar and Mr. Leonard Yelifari were all dedicated and reliable co-workers and friends at home, in the village and in the laboratory. Mr. Awel Mohammed in particular is specially acknowledged for being an excellent chauffeur. Special thanks go to Mr. Simon Abugri and Mr. Jacob Jambeidu (of the Garu clinic), Alhaji Issihaka and Mr. Solomon Ateiga who made my stay in Garu a memorable one.

The technical assistance of Ms Coby Blotkamp, Mr. Eric Brienen and Dr. Jaco Verweij in offering excellent training in diagnostic parasitology both to me and to the dozens of students who participated in the field work in Ghana is gratefully acknowledged. I would like to personally thank the many Dutch and Ghanaian students; Hanneke de Gruijter, Liselot van Iersel, Elsemieke Plasmeijer, Bram Diederer, Gabrielle van Ramshorst, Esther Hamoen, Martijn van Rooijen, Lisette Kunz, Inge Kettenis, Diana Slats, Fieke Oostvogel, Thomas Snoeks, Carmen Gerlach, Smita Chaturvedi, Erik Planken, Ronald de Keizer, Marjolein Kleppe, Sandra van Amsterdam, Jaela Langius, Stefan Holzer, Edwin Yenli, Isaac Akanko, Ayamga Abu, Abdul-Latif and Daakpala Roland for investing their energy and ideas to make the field work successful.

Our collaboration with Hans Meij and colleagues who joined us in our later days in Garu was appreciated. The administrative and logistic support of Hans Meij in particular is acknowledged.

Ultrasound examination in the field would not have been realised without the involvement of Dr. Nestor Spannbrucker and his wife Dr. Katherine Spannbrucker. The support of the staff of the DBL-Institute for Health Research and Development in Copenhagen during my SPSS training was much appreciated. I in particular appreciate the support and interest of Dr. Annette Olsen and Dr. Henry Madsen in my training.

In addition to offering valuable scientific and technical advice throughout the period of field work, Dr. John Horton had been meticulous in handling all linguistic issues of many chapters of this thesis despite his busy schedule. Dr Blandine Franke-Fayard of the Department of Parasitology in Leiden is acknowledged for her kind assistance to translate the summary in French, and Lisette van Lieshout from the same Department for her general support.

Several friends and colleagues at the Department of Parasitology in LUMC contributed in many ways to the success of this thesis. Their assistance with computers and warm clothes were supportive and kept me working. I will always remember the Dutch coffee times at the institute even though my limited Dutch could not allow me to follow all the wonderful discussions and conversation at coffee times.

Sharing beers at the “crazy” Dutch students’ societies’ parties offered me a great experience in my stay in The Netherlands. I much appreciated the concerns of Ronald Keizer, Roman Keizer, “Little Pits”, Gennike and host of friends for their great reception.

The staff of PDRC in Ghana is acknowledged for their ever readiness in offering us technical and logistic assistance. In particular acknowledge the assistance of Dr. Von Asigri, Mr. Gilbert Dery, Madam Vivian, Madam Confort, Baba Karimu and Sir Auther.

Perhaps, my involvement in this study would not have been possible without the personal involvement and keen interest of Prof Nii Amon Kotei the former dean of the medical school in Tamale. I fully acknowledge all efforts he invested into making this a reality. I also acknowledge the important suggestions and pieces of advice given to me by Rev. Prof Saa Dittoh and Mr. Oscar Allandong of UDS which enables me to carry out the field work.

Finally, I am indebted to my wife Ernestina Yirkyio and my daughter Kaame Antoinette Ziem for their wonderful support and understanding during hard times. To my mother and brothers and sisters, I appreciated your understanding during times that I absented myself from home when I was needed.
