Cognitive control and binding in context-based decision-making
normal and dopamine deviant populations

Nelleke Corine van Wouwe

Cognitive control and binding
in context-based decision-making
normal and dopamine deviant populations

Proefschrift ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van de Rector Magnificus, Prof. mr. P. F. van der Heijden
volgens besluit van het College voor Promoties
te verdedigen op donderdag 3 december 2009
klokke 15:00 uur

door
Nelleke Corine van Wouwe
geboren te Rotterdam
in 1979

Promotiecommissie

Promotor Prof. Dr. B. Hommel
 Prof. Dr. K. R. Ridderinkhof, Universiteit van Amsterdam

Co-promotor Dr. G. P. H. Band

Overige leden Prof. Dr. E. A. M. Crone
 Prof. Dr. L. J. Kenemans, Universiteit Utrecht
 Dr. R. Cools, Radboud Universiteit Nijmegen
 Dr. S. A. W. Wylie, University of Virginia

In loving memory of

my parents Wim en Liesbeth

Contents

Introduction (*Chapter 1, p.9*)

Proactive Control and Episodic Binding in Context Processing Effects (*Chapter 2, p.33*)

Goal-driven versus stimulus-driven components of biased decision-making
A functional neuroimaging study of the AX-CPT (*Chapter 3, p.61*)

Positive affect modulates flexibility and evaluative control (*Chapter 4, p.99*)

Learning processes associated with caudate and putamen are improved
by dopaminergic modulation, evidence from Parkinson's disease (*Chapter 5, p.135*)

Deep brain stimulation of the subthalamic nucleus improves reward-based
decision-learning in Parkinson's disease (*Chapter 6, p.163*)

Discussion (*Chapter 7, p.191*)

References (*p.207*)

Samenvatting (*p.233*)

Dankwoord (*p.241*)

Curriculum Vitae (*p.244*)
