## Acknowledgments

Four years ago, I had a phone interview with Marcellus and Mark, as a consequence, I came to the Netherlands and started my life here. I am a “special” one who worked in ProChem group because that I did not know anything about protein expression and most of my works were done in Bio-syn group. It was a big challenge to survive. I had two lab duties, two work discussions and twice amount of meeting compared to other people. However, I made it due to a lot of helps from both groups.

First of all, I would like to thanks Marcellus and Mark for the weekly discussions and gave me the freedom to do what I would like to do in my project. Within the ProChem group, all of my proteins were produced by Anneloes and Monika. Thanks for that. Without those proteins, my works cannot be done. My English tutor, Simon, worked very hard for improving my academic writing. The Queen, Sandra, we had a lot of fun in the lab and out of the lab. India King, Bharat, I miss your curry and your laugh. Peter, thanks for all the helps and your overviews on my project, which are the starting point of my work. Mathias, a genius for NMR and modeling, It is always helpful to discuss and to predict a model with you. My students, Alexi, Abdullah and Sander, thanks for working very hard with me. The Prochem members (Qamar, Dan, Jia-Ying, Ingrid, Serken, Tahzeen, Claudia, Auke, Francis, Johan, Ruta & Dipen, Jesika, Mathilde, Bas, Masa, Roland), thanks for daily conversions and you guys are extremely helpful and fun to be around. Fons and Karthick, you are very helpful for NMR experiments. Your magic hand can always tune the mechanism at perfect condition.

Gijs, Hermen and Dmitri, thanks for the irregular meeting. “*Les Trois Mousquetaires*” (Rian, Hans and Nico) thanks for all the helps in the lab. You guys are amazing and my hero. Nora, Hans K., Pieter, Amar, Lianne, Sarsha, Kah-Jee, Nan, Chi-Lin, Hui, Bing, Bo-Tao, Qingju and Xiaoping thanks for the daily conversions and the helps in Bio-syn group, of course, all other Bio-Syn members as well. Jianbing, my hoodmate, thanks for the kind supporting and giving me some space to do my synthesis.

Rongfang, Louise, Martin van Son, Martin, Harshal, Giuliana and all other Taiwanese and Chinese friends (Sorry, I can’t write down all the names. Otherwise, it will be another ten pages....) thanks for participating in my life in Leiden. I will remember all the fantastic parties and meetings.

At the end, a special thanks to Ching-Ya and my family. Without you supporting, I could not achieve this and get my PhD.
