Title: Strings and AdS/CFT at finite density
Issue Date: 2014-06-24

Strings and AdS/CFT at finite density

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus
Prof. Mr. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op dinsdag 24 juni 2014
klokke 10.00 uur

door

Mikhail Goykhman

geboren te Sumgait, Sovjet-Unie in 1989

Promotiecommissie

Promotores:	Prof. Dr. J. Zaanen
	Dr. A. Parnachev
Overige leden:	Dr. A. Starinets (Oxford University)
	Prof. Dr. S. Vandoren (Utrecht University)
	Prof. Dr. A. Achucarro
	Dr. A. Boyarsky
	Prof. Dr. E. R. Eliel

Casimir PhD series Delft-Leiden 2014-16
ISBN 978-90-8593-191-1

Dit werk maakt deel uit van het onderzoekprogramma van de Nederlandse Organisatie voor Wetenschappelijk Onderzoek (NWO).

This work is part of the research programme of the Netherlands Organisation for Scientific Research (NWO).

Contents

1 Introduction **1**

1.1 Preface 1

1.2 String theory 3

1.2.1 The Polyakov action and two-dimensional conformal field theory 3

1.2.2 Ramond-Neveu-Schwarz superstring 9

1.2.3 Open RNS superstring and zero-point energy 13

1.2.4 Closed RNS superstring and Ramond-Ramond fields 17

1.2.5 D-branes 17

1.2.6 T-duality and D-brane intersections 19

1.2.7 Strings in a background; supergravity and supersymmetric Yang-Mills theories 23

1.2.8 Wess-Zumino-Witten model 25

1.2.9 D-branes and black branes 28

1.3 Holographic correspondence 29

1.3.1 The near-horizon limit 29

1.3.2 AdS space and its symmetries 30

1.3.3 $\mathcal{N} = 4$ supersymmetric Yang-Mills theory 31

1.3.4 Large N limit 32

1.3.5 AdS/CFT correspondence 33

1.3.6 Less supersymmetry, non-conformal field theories . . 34

1.3.7 Gubser-Klebanov-Polyakov-Witten formula 35

1.3.8 Probe branes and flavor 36

1.3.9 Finite temperature and chemical potential, thermodynamics 36

1.3.10 Holographic description of Little String Theory . . . 37

1.4 This thesis 39

1.4.1 Chapter 2 39

1.4.2 Chapter 3 . . . 39
1.4.3 Chapter 4 . . . 39

2 Fluctuations in finite density holographic quantum liquids 43
2.1 Introduction and summary . . . 43
2.2 Fermi liquid and the random phase approximation . . . 49
2.3 Dp brane in $AdS_5 \times S^5$ background . . . 53
2.4 Holographic zero sound . . . 56
2.4.1 Zero sound in the $D3/Dp$ system with $d = 2 + 1$ dimensional intersection . . . 57
2.4.2 Effective theory for the sound mode . . . 64
2.4.3 Thermodynamic properties of trivial embeddings . . . 66
2.5 Holographic current-current correlators at finite frequency and momentum . . . 67
2.5.1 Fluctuations of electric field strength E . . . 67
2.5.2 Fluctuations of the transverse component of the gauge field . . . 69
2.5.3 Non-vanishing magnetic field . . . 69
2.6 Discussion . . . 74
2.7 Appendix: Higher-derivative corrections to $L_{DBI}(a_1)$ . . . 77

3 S-parameter, Technimesons, and Phase Transitions in Holographic Tachyon DBI Models 89
3.1 Introduction and summary . . . 89
3.2 Holographic TDBI at finite temperature and chemical potential . . . 91
3.3 S parameter . . . 98
3.3.1 Review of technicolor and S, T, U parameters . . . 98
3.3.2 Computation of the S parameter from the tachyon DBI action . . . 103
3.3.3 Soft Wall . . . 109
3.3.4 Hard wall . . . 111
3.4 Lightest mesons . . . 112
3.5 Conclusions . . . 114
3.6 Appendix: Conformal phase transition and double-trace coupling running . . . 115
3.6.1 Conformal phase transitions and Wilsonian RG . . . 115
3.6.2 Double trace running from tachyon DBI . . . 117

4 Stringy holography at finite density **127**
4.1 Introduction . . . 127
4.2 Thermodynamics of the charged black hole . . . 130
4.3 The physical state conditions and vertex operators . . . 132
4.3.1 BRST quantization . . . 132
4.3.2 Ground state vertex operator . . . 134
4.3.3 Vertex operators of massless states in type-II superstring theory . . . 136
4.3.4 (Anti)holomorphic vertex operators of massless modes in the $R \times \frac{SL(2,R)}{U(1)}$ coset model . . . 137
4.3.5 (Anti)holomorphic vertex operators of massless modes in the $R \times \frac{SL(2,R)\times U(1)}{U(1)}$ coset model . . . 140
4.4 Vertex operators of massless NS-NS states, and correlation functions . . . 144
4.4.1 Vertex operators and their correlation functions . . . 145
4.4.2 Low-energy modes . . . 149
4.4.3 "$2k_F$" singularity . . . 150
4.5 Type-II gravity approximation . . . 151
4.6 Discussion . . . 157
4.7 Appendix A: Conventions and review of the gWZW model on the $\frac{SL(2,R)\times U(1)}{U(1)}$ . . . 159
4.7.1 Conventions . . . 159
4.7.2 Gauged WZW model on the $\frac{SL(2,R)\times U(1)}{U(1)}$ . . . 161
4.8 Appendix B: Heterotic gravity approximation . . . 164
