## Acknowledgements

The experiments described in this thesis were performed at the Department of Gastroenterology and Hepatology, Leiden University Medical Center, The Netherlands (Head: Prof. dr. C.B.H.W. Lamers). I am grateful to all the people who were involved in the implementation and fulfillment of this thesis.

Specially, I would like to express my appreciation to the laboratory of the department (Head: Dr. ir. H.W. Verspaget) for the offered opportunity to use the nice scientific facilities and for the inspiring environment to perform my PhD project. The essential academic guidance and help were fundamental for the accomplishment of this thesis. In particular, I would like to mention R.A. van Hogezaand, M.J.W. Meijer, L. Kruidenier, and P. ter Beek for their very useful help and suggestions. I am indebted to J. M. van der Zon, M. van den Berg, W. van Duijn and J.J. Baelde for their excellent and kind technical support.

I would like to express my gratitude to Prof. Du Bailian from the Henan Medical University and to Drs. Jiang Zhonghua, Yu Guiqin and other former colleagues in the Beijing Aerospace Central Hospital for their support and encouragement to proceed with this project. Thanks should be addressed also to my wife, Tian Runlan, and to my son because their coming brought an integrated family life back to me. This thesis is also dedicated to my son, Gao Tianran, who is a motivational source for me.

I would like to thank The Netherlands, a country in which there are many miracles: wonderful windmills, amazing wooden shoes, beautiful tulips, tasty herring, as well as a great Delta project. A special thank to Leiden, the famous university town, which provides a safe and convenient environment, and an intense academic atmosphere that were very helpful to complete my study.

## Curriculum Vitae

Qiang Gao was born on 21 August, 1961 in Zhengzhou, Henan province, P.R. China.

Feb. 1967-Jul. 1977: Primary and secondary education at Zhongmou County Schools, Zhengzhou, Henan province, China.

Feb. 1978-Dec. 1982: Undergraduate medical student, obtained the Bachelor degree of Medicine at Henan Medical College (later called Henan Medical University), Zhengzhou, Henan province, China.

Feb. 1983-Aug. 1986: Medical doctor in the Department of Internal Medicine, Zhongmou County Hospital, Henan province, China.

Sept. 1986-Jul. 1989: Graduate medical student under the supervision of Prof. Du Bailian, obtained the Master degree of Medicine in the Department of Anatomy, Henan Medical University. The project was entitled: allotransplantation of intrahepatic pancreatic islets in diabetic rats induced by alloxan.

Sept. 1989-Dec. 1998: Medical doctor in the Department of Gastroenterology-Hepatology (Heads: Drs. Jiang Zhonghua and Yu Guiqin), Beijing Aerospace Central Hospital (Central Hospital of China Aerospace Corporation), Beijing, China.

Jan. 1999-Jan. 2000: Visiting scholar from the Chinese Scholarship Council in the Department of Gastroenterology-Hepatology (Head: Prof. dr. C.B.H.W. Lamers), Leiden University Medical Center, Leiden, The Netherlands.

Feb. 2000-Feb. 2005: Continued the research as a PhD student in the same department under the supervision of Prof. dr. C.B.H.W. Lamers and Dr. ir. H.W. Verspaget. The PhD project mainly focused on basic and clinical aspects of mucosal inflammation and healing in Crohn's disease.
