

## ADDENDA ET CORRIGENDA TO O.LEID.

P.J. SIJPESTEIJN AND K.A. WORP

In 1980 R.S. Bagnall, P.J. Sijpesteijn and K.A. Worp published the collection of Greek ostraka in the National Museum of Antiquities at Leiden<sup>1</sup>. Dr. M.J. Raven, curator of the Egyptian department of the said museum, brought to our attention not only a batch of very faded ostraka which we did not even include among the descriptions (O.Leid.411 - 676; 683 - 697) but also succeeded in joining several ostraka published by us under different publication-numbers. He also pointed out some misprints and wrong inventory numbers. In the following we will publish the most important corrections.

## I

a) O.Leid.17 (F 1901/1.218) + O.Leid.35 (ZN 3) =  
F 1901/1.218 (4.8 × 8.7 cm.)

1) The praktor is P(ros).P(tol.) VIII 1745a. No praktor whose name ends in -ας ('Ασκληῶς, Σαμβῶς, e.g.) is listed in the PP.

7) Year 34 is 252/1, 148/7, 137/6 or 84/3 B.C. On palaeographical grounds a date in the IIIrd century B.C. seems excluded.

b) O.Leid.124 (F 99/1.350) + O.Leid.129 (ZN 6) =  
F 99/1.350 (12.2 × 6.2 cm.)

1) The praktor argyrikon, Apol ( ), is attested between A.D. 107 (WO 497) and A.D.110 (O.Tait 524). His name possibly was Ἄπολ(λάνιος). Cf. also WO 498-500, 502, 503; O.Theb.81; O.Tait 522, 523, 622-624, 825-826.

4) There are, following Μεσορη, so many traces that it seems likely that Μεσορη was followed by ἐπαγομένων (more likely than not abbreviated) and a digit. The present ostrakon has, therefore, in all likelihood to be dated between August 24 and August 28, A.D. 107.

5) In this line probably the remains of the name of the person who signed this ostrakon.

c) O.Leid.242 = ZN 27 (11 × 6.8 cm.) has been enlarged with a piece at the right side. No essential information has, however, been gained.

d) O.Leid.296 = F 97/6.695 (5.5 × 9.2 cm.) has been enlarged with a piece at the bottom. Read in line 5: Ἄ?]μῶις εἴ Ἄμῶις ᾤ.

e) O.Leid.552 (= F 99/1.237) + O.Leid.560 (= F 99/1.280) (15 × 15 cm.) belong to the same ostrakon.

f) O.Leid.555 (= F 99/1.256) + O.Leid.559 (= F 99/1.272) (6.3 × 8.4 cm.) belong to the same ostrakon:

O.Leid.283 is a similar ostrakon.

3) Psais, son of Horos, is probably identical with the taxpayer in O.Leid.93,2 (A.D. 113).

4) Seourios, son of Horos, occurs also in O.Leid.283,8 (first half of the IIrd century A.D.).

g) O.Leid.295 is identical with O.Leid.311. The correct inventory number is F 97/6.686.
