The role of 14q32 microRNAs in vascular remodelling

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof. mr. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op 9 maart 2017
klokke 16.15 uur

door

Sabine Marlies Janine Welten

Geboren te Amsterdam in 1988

Promotor: Prof. dr. P.H.A. Quax

Co-promotor: Dr. A.Y. Nossent

Leden Promotiecommissie: Prof. dr. H.C.J. Eikenboom
Prof. dr. J.W. Jukema
Prof. dr. M.J.T.H. Goumans
Prof. dr. C.J.M. de Vries (AMC, Amsterdam)
Dr. R.A. Boon (Goethe Universität, Frankfurt am Main)

The research described in this thesis was supported by the Netherlands Institute for Regenerative Medicine (NIRM, FES0908) and was performed at the department of Vascular Surgery, Leiden University Medical Center, Leiden, The Netherlands.

Table of contents

Chapter 1	General introduction and outline of thesis	9
Part I	14q32 microRNAs in vascular remodelling	
Chapter 2	The multifactorial nature of microRNAs in vascular remodelling	27
Chapter 3-I	Inhibition of 14q32 microRNAs miR-329, miR-487b, miR-494 and miR-495 increases neovascularization and blood flow recovery after ischemia	59
Chapter 3-II	Letter regarding article "MicroRNA-155 exerts cell-specific antiangiogenic but proarteriogenic effects during adaptive neovascularization"	107
Chapter 4	Inhibition of microRNA-494 reduces carotid artery atherosclerotic lesion development and increases plaque stability	113
Chapter 5	The role of 14q32 microRNAs in restenosis: inhibition of the 14q32 microRNA miR-495 reduces lesion formation, intimal hyperplasia and plasma cholesterol levels in experimental restenosis	137
Part II	(post)transcriptional regulation of 14q32 microRNAs	
Chapter 6	Inhibition of Mef2a increases post-ischemic neovascularization via 14q32 microRNAs miR-329 and miR-494	163
Chapter 7	Posttranscriptional regulation of 14q32 microRNA miR-329 during vascular regeneration after ischemia	181
Part III	14q32 microRNAs in adipose tissue	
Chapter 8	Upregulation of 14q32 microRNAs in human subcutaneous adipose tissue samples of patients with critical limb ischemia undergoing major amputation	201

Part IV

Chapter 9	Summary and future perspectives	219
	Nederlandse Samenvatting	231
	List of Publications	239
	Curriculum Vitae	245
