Title: Time is of the essence - investigating kinetic interactions between drug, endogenous neuropeptides and receptor

Issue Date: 2017-04-06

Time is of the essence

**Investigating kinetic interactions between drug,
endogenous neuropeptides and receptor**

Cover design: Rochelle Vergroesen & Indira Nederpelt

Cover art: Rochelle Vergroesen

Thesis lay-out: Indira Nederpelt

Printing: GVO drukkers & vormgevers B.V., Ede

Time is of the essence

Investigating kinetic interactions between drug, endogenous neuropeptides and receptor

Proefschrift

Ter verkrijging van de graad van Doctor aan de Universiteit Leiden,

op gezag van Rector Magnificus Prof. Dr. C.J.J.M. Stolker,

volgens besluit van het College voor Promoties te verdedigen op donderdag 6 April 2017

klokke 16:15 uur

Door

Indira Nederpelt

Geboren te Rotterdam, Nederland

In 1988

Promotor: Prof. Dr. A.P. IJzerman

Co-promotor: Dr. L.H. Heitman

Promotie commissie:

Prof. Dr. H. Irth (chair)

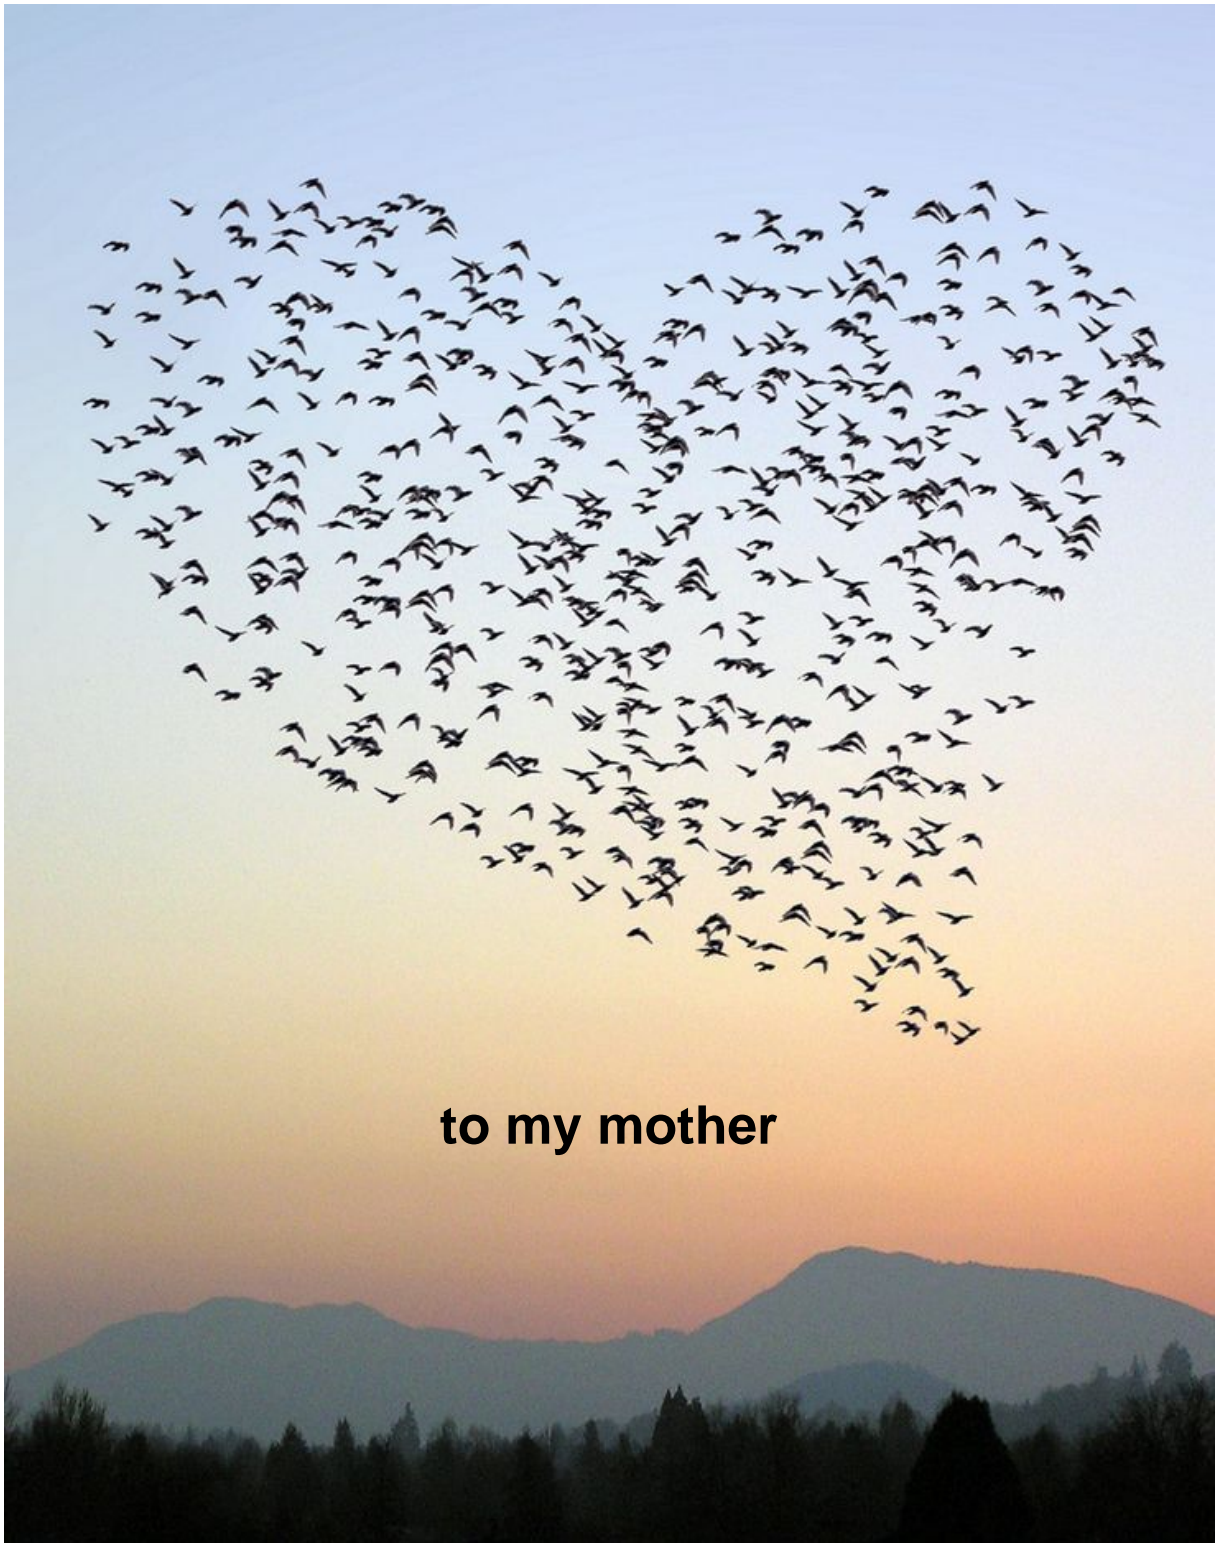

Prof. Dr. J.A. Bouwstra (secretary)

Dr. E.C. de Lange (assistant professor of pharmacology at the LACDR, Leiden University)

Prof. Dr. G. Vauquelin (professor of molecular pharmacology at the Vrije Universiteit Brussel)

Prof. Dr. R.A. Adan (professor of molecular pharmacology at the Utrecht Medical Centre)

The research described in this thesis was performed at the department of Medicinal Chemistry of the Leiden Academic Centre for Drug Research (LACDR), Leiden University (Leiden, The Netherlands). The research was financially supported by EU/EFPIA Innovative Medicines Initiative Joint Undertaking, K4DD grant n° 115366.

Index

Chapter 1 General Introduction	9-24
Chapter 2 Kinetic profile of neuropeptide – receptor interactions	25-42
Chapter 3 Characterization of 12 GnRH peptide agonists – a kinetic perspective	43-70
Chapter 4 Persistent GnRH receptor activation in pituitary α T3-1 cells analyzed with a label-free technology	71-88
Chapter 5 Kinetic binding and activation profiles of endogenous tachykinins targeting the NK1 receptor	89-107
Chapter 6 From receptor binding kinetics to signal transduction; a missing link in predicting <i>in vivo</i> drug-action	108-127
Chapter 7 Conclusions and future perspectives	128-142
Summary	143-148
Samenvatting	149-154
List of publications	155-158
Curriculum Vitae	159-162
Acknowledgements	163-165
