The author of this thesis participated in the MD/PhD project funded by Leiden University Medical Center (LUMC). The research described in this thesis was financially supported by the Center for Translational Molecular Imaging (CTMM and MUSIS project), Dutch Cancer Society (grant UL2010-4732) and ERC Advanced Grant project SURVive (grant 323105).

Financial support by Quest Medical Imaging, Curadel, Chipsoft, Milabs, LUMC

Targeted imaging in oncologic surgery

Preclinical studies utilizing
Near-Infrared Fluorescence and Radioactivity

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden
op gezag van Rector Magnificus prof.mr. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op donderdag 13 april 2017
klokke 16:15 uur

door
Martin Cornelis Boonstra
Geboren te Naarden
In 1986

Promotor
Prof. dr. C.J.H. van de Velde

Co-promotor
Dr. A.L. Vahrmeijer

Leden promotiecommissie
Prof. dr. B.P.F. Lelieveldt
Prof. dr. J. Burggraaf
Prof. dr. C.A. Marijnen
Prof. dr. C.W.G.M. Löwik (Erasmus, Rotterdam)
Prof. dr. G.M. van Dam (UMCG, Groningen)

TABLE OF CONTENTS

Chapter 1	General introduction and outline of thesis	9
Part I: Evaluation of targets		
Chapter 2	Selecting targets for tumor imaging an overview of cancer-associated membrane proteins	19
Chapter 3	Stromal targets for fluorescent-guided oncologic surgery	53
Chapter 4	Clinical applications of the urokinase receptor (uPAR) for cancer patients	71
Chapter 5	Expression of uPAR in tumor-associated stromal cells is associated with colorectal cancer patient prognosis: a TMA study	113
Part II: Preclinical development and evaluation of novel tracers		
Chapter 6	Preclinical evaluation of a novel CEA-targeting Near-Infrared Fluorescent tracer delineating colorectal and pancreatic tumors	129
Chapter 7	Preclinical evaluation of a novel EpCAM-targeting fluorescent imaging agent to improve intraoperative cancer visualization	153
Chapter 8	Preparation of the zwitterionic near-infrared fluorescent peptide cRGD-ZW800-1 for clinical trials in image-guided cancer surgery	173
Chapter 9	uPAR-targeted multimodal tracer for pre- and intraoperative imaging in cancer surgery	193
Chapter 10	Preclinical uPAR-targeted multimodal imaging of locoregional head-and-neck cancers	217
Part III		
Chapter 11	Discussion and future perspectives	237
Chapter 12	Summary	249
	Nederlandse samenvatting	255
	List of publications	261
	Curriculum Vitae	267
	Dankwoord	271
