Targeted imaging in oncologic surgery

Preclinical studies utilizing Near-Infrared Fluorescence
and Radioactivity

1. One universal membrane protein that can be utilized as oncotarget for all tumors does not exist. (dit proefschrift)
2. Larger ligands (>50kDa) have superior imaging characteristics. (dit proefschrift)
3. A powerful synergy can be achieved when nuclear and fluorescent imaging modalities are combined. (dit proefschrift)
4. Real clinical benefit of image-guided surgery is expected from targeted agents. (dit proefschrift)
5. Targeting stroma cells has advantages over targeting tumor cells.
6. Fluorescentie geleide chirurgie wordt alleen breed geïmplementeerd wanneer het gecombineerd wordt aangeleverd: tracer met camera system.
7. Super specialisme is niet in het voordeel van de patiënt, omdat door zo'n specialist alleen naar zijn/haar eigen specialisme wordt gekeken. (Marcel Levi, 2017)
8. Keuzevrijheid en marktwerking zijn niet geschikt voor de zorg.
9. "The life so short, the craft so long to learn." (Hippocrates, Aphorismi 400 BC)
10. "The Gin & Tonic has saved more Englishmen's lives & minds, than all doctors in the empire." (Winston Churchill, 1874-1965)
11. "With self-discipline most anything is possible." (Theodore Roosevelt, 1858-1919)
12. "Soldiers generally win battles; generals get credit for them." (Napoleon Bonaparte, 1769-1821)
