Acknowledgements

This dissertation could not have been written without the gracious contributions of many people along the way.

First, I wish to thank my three supervisors, Dr. Maarten Kossmann, Dr. Alexander Lubotsky, and Dr. Gabrielle van den Berg, for their wealth of knowledge in languages and linguistics and for their tireless help and encouragement. I also appreciate the valuable and insightful feedback I received from Dr. Donald Stilo, Dr. Rint Sybesma, Dr. Marian Klamer, and Dr. Leila Dodykhudoeva.

I am grateful to my teachers and colleagues at Trinity Western University, the University of North Dakota, and Xinjiang University, who have invested in my formation as a linguist, making it possible for me to conduct this research.

I am greatly indebted to Moss Doerksen, Henriette Daudey, Joshua P.L. Chan, and Lydia Ying Ying Lam for their practical contributions. Moss, thank you for creating yet another beautiful map. I'm lucky to have such a gifted friend who is willing to help. Henriette, thank you so much for helping me with the Dutch translation! Joshua and Lydia, you have been a tremendous help in all of the defence preparations, and it would not have been possible without you. Thank you very much for your kindness, generosity, friendship, and willingness to help.

I truly appreciate Timothy Palmer, Stephen & Hyeju Kim, Peter Kim, and Maria Kim for their humor, dedication, contagious joy, and for their unwavering love and support for me.

Last but not least, my deepest thanks go to my dear Sarikoli friends, without whose hospitality, help, and support none of my work on their language would have been possible. Thank you for warmly receiving me into your family, for your patience with me, and for taking pride in your language and culture. I wish to relay my special thanks to Gawar Deyqun, Neikramon Ibrukhim, Neeyuft Latfik, and Zamir Saydula for their help in language learning and analysis. I hope that this humble work will play a small part in preserving the vitality of your beautiful language for many more years.
