Advancements in minimally invasive image-guided liver therapies

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof.mr. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op 26 oktober 2017
klokke 16.15 uur

door

Mark Christiaan Burgmans

geboren te Leiden
in 1972

Promotor:

Prof. dr. A. de Roos

Co-promotor:

Dr. A.R. van Erkel

Leden promotie commissie:

Prof. dr. W.P.Th.M. Mali, Universitair Medisch Centrum Utrecht

Prof. dr. O.M. van Delden, Academisch Medisch Centrum

Prof. dr. L.F. de Geus-Oei, Leids Universitair Medisch Centrum

Dr. A.L. Vahrmeijer, Leids Universitair Medisch Centrum

Dr. M.J. Coenraad, Leids Universitair Medisch Centrum

CONTENTS

Chapter 1	General introduction	7
-----------	----------------------	---

PART I PERCUTANEOUS RADIOFREQUENCY ABLATION

Chapter 2	Differences in patient characteristics and midterm outcome between Asian and European patients treated with radiofrequency ablation for hepatocellular carcinoma	19
Chapter 3	Phantom study investigating the accuracy of manual and automatic image fusion with the General Electric Logiq E9: implications for use in percutaneous liver interventions	35
Chapter 4	Local tumor progression and survival rates after combined radiofrequency ablation and drug-eluting bead chemoembolization in unresectable hepatocellular carcinoma	53

PART II TRANSARTERIAL LIVER THERAPIES

Chapter 5	Pilot study evaluating catheter-directed contrast-enhanced ultrasound compared to catheter-directed computed tomography hepatic arteriography as adjuncts to digital subtraction angiography to guide transarterial chemoembolization	71
Chapter 6	Radioembolization with infusion of Y90 microspheres into a right inferior phrenic artery with hepatic tumor supply is feasible and safe	83
Chapter 7	Computed tomography hepatic arteriography has a hepatic falciform artery detection rate that is much higher than that of digital subtraction angiography and 99mTc-MAA SPECT/CT: implications for planning Y90 radioembolization	99
Chapter 8	Image-guided personalized predictive dosimetry by artery-specific SPECT/CT partition modeling for safe and effective Y90 radioembolization	113
Chapter 9	Percutaneous isolated hepatic perfusion for the treatment of unresectable liver malignancies	137
Chapter 10	Prospective clinical and pharmacological evaluation of the Delcath System's second generation (GEN2) hemofiltration system in patients undergoing percutaneous hepatic perfusion with melphalan	161

PART III PATIENT MANAGEMENT

Chapter 11	Impact on patient safety and satisfaction of implementation of an outpatient clinic in interventional radiology (IPSIPOLI-study): a quasi-experimental prospective study	181
Chapter 12	General discussion and future perspectives	199
Appendix	Nederlandse samenvatting	211
	Curriculum vitae	219
	List of publications	221
	Dankwoord	225
