## Acknowledgements

Too many people to mention them all by name have in some way enriched my life. No matter how small, know that your contributions have not gone unnoticed. My world is brighter, richer and more beautiful because you were or are a part of it. Thank you.

I would like to mention specifically:

I am indebted to all the patients who have so selflessly donated their time, making the work presented in this thesis possible. I am also very grateful to all the oncologists who participated in the IBIS-study for giving us access to their consultation room, and the staff of the participating outpatient clinics who helped us to recruit patients.

My thesis advisors, Anne, Ellen, Hanneke and Arwen, thank you for the opportunity you have given me. I will always be in your debt for introducing me to the fascinating world of medical decision-making and communication. Your passion and enthusiasm is infectious and inspiring.

I am grateful to the members of the PhD committee, prof. dr. E.W. Steyerberg, prof. dr. A.M. van Dulmen, prof. dr. A.J. Gelderblom and dr. G.J. Liefers, for taking the time to review this thesis.

My paranymphs: Nanny, thank you for your never waivering enthusiasm and tireless efforts. Working with you has been an absolute joy. Marleen, thank you for being such a wonderful office-mate. Our rambling conversations -seemingly without rhyme or reason- were always fun and more often than not helped me clarify my thoughts. I'm so happy you both wanted to be my paranymphs!

All co-authors who have collaborated to the work presented in this thesis, thank you for sharing your knowledge.

Marjanka, I will always be indebted to you for introducing me to the fascinating field of oncology and giving me wonderful oportunities to get some invaluable experience. I look forward to continue our collaboration.

Veerle and Riekie, thank you for the wonderful opportunity you have given me. I look forward to continue working with you and hopefully soaking up some of your knowledge!

Anja, Anine, Aryan, Evelien, and Annelotte thank you for your help transcribing and coding the consultations.

My old office mates in Leiden (Jaap and Monique), all former and current colleagues, and my LCD classmates (Dóra, Mine, Claudia, Tjitske, Mariska, Karen, Lisanne and Tobias), thank you for being great sources of inspiration and a laugh.

My loved ones.

These final words are yours by right, my beloved mami Edna. I am who I am because of you. All I have and all I might ever achieve, I owe to your guidance and loving encouragement. Thank you for always being the rainbow in my cloud.
