Title: Targeting and exploiting cytomegalovirus for vaccine development

Issue Date: 2017-12-05

TARGETING AND EXPLOITING CYTOMEGALOVIRUS FOR VACCINE DEVELOPMENT

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof. mr. C.J.J.M. Stolker,
volgens besluit van het college voor Promoties
te verdedigen op
dinsdag 5 december 2017 klokke 15:00 uur

door

Eleni Panagioti
geboren te Athene in 1988

The research described in this thesis was performed at the Departments of Medical Oncology and Immunohematology and Blood Transfusion of the Leiden University Medical Center, Leiden, The Netherlands and was funded by the EU under the FP7 Marie Curie Action VacTrain (Grant number: 316655). Financial support for the publication of this thesis was provided by the Leiden University Medical Center.

Cover Design: Eleni Panagioti & Botsas Design Studio. Inspired by Wassily Kandinsky's colour studies and squares with concentric circles.

Layout & Printing: Off Page, Amsterdam

ISBN: 978-94-6182-855-2

PROMOTOR

Prof. dr. S. H. van der Burg

CO-PROMOTOR

Dr. R. Arens

LEDEN PROMOTIECOMMISSIE:

Dr. M. G. H. Betjes (*Erasmus University Medical Center, Rotterdam*)

Prof. dr. A. Geluk

Prof. dr. E.J.H.J. Wiertz (*University Medical Center Utrecht, Utrecht*)

Prof. dr. B.A. M. van der Zeijst

TABLE OF CONTENTS

Chapter 1	General introduction	7
Chapter 2	The breadth of synthetic long peptide vaccine-induced CD8 ⁺ T cell responses determines the efficacy against mouse cytomegalovirus infection	29
Chapter 3	Enforced OX40 stimulation empowers booster vaccines to induce effective CD4 ⁺ and CD8 ⁺ T cell responses against mouse cytomegalovirus infection	59
	Appendix to chapter 3	91
Chapter 4	The spontaneous response to Human Cytomegalovirus immediate early protein 2 is focused on 5 highly immunogenic regions and predominantly comprises polyfunctional type 1 CD4 ⁺ T cells	99
Chapter 5	The level of pre-existing immunity determines the efficacy of MCMV-based vaccine vectors	127
Chapter 6	Requirements for effective T cell-inducing vaccines against chronic viral infections	147
Chapter 7	General Discussion	169
Chapter 8	Appendix	183
	English summary	185
	Nederlandse samenvatting	187
	Abbreviations	189
	Curriculum vitae	190
	List of publications	191
	Aknowledgements	192
