Table of Contents

General introduction - Atherosclerosis	9
The impact of mast cells on cardiovascular diseases	45
Inhibition of lysophosphatidic acid receptors 1 and 3 attenuates atherosclerosis development in LDL-receptor deficient mice	77
Hypercholesterolemia induces a mast cell – CD4 ⁺ T cell interaction in atherosclerosis	97
Disruption of a CD1d-mediated interaction between mast cells and NKT cells aggravates atherosclerosis	119
Phenotypic characterization of human intraplaque mast cells using flow cytometry	139
Mast cell depletion in advanced atherosclerosis does not induce plaque regression	151
General discussion - Future perspectives	167
Dutch Summary (Nederlandse Samenvatting)	185
Curriculum Vitae	199
