Author: Salinas Poblete V.N. Title: Linking simple molecules to grain evolution across planet-forming disks Issue Date: 2017-12-18 Linking simple molecules to grain evolution across planet-forming disks.

Linking simple molecules to grain evolution across planet-forming disks.

Proefschrift

ter verkrijging van de graad van Doctor aan de Universiteit Leiden, op gezag van Rector Magnificus prof. mr. C.J.J.M. Stolker volgens besluit van het College voor Promoties te verdedigen op maandag 18 december 2017 klokke 10:00 uur

door

Vachail Nicolás Salinas Poblete

geboren te Santiago, Chile in 1990 Promotiecommissie

| Promotores: | Prof. dr.E.F. van Dishoeck | |

| | | 5.4.5 Line excitation | 90 | |
| | | 5.4.6 Abundance estimates | 91 | |
| | | 5.4.7 Best-fit parameters | 91 | |
| | 5.5 | Discussion | 94 | |

| 5.5.1 The inner depression | 94 |
|--|-----|
| 5.5.2 Limitation of DCO ⁺ as a CO snowline tracer | 94 |
| 5.5.3 The origin of the third ring | 95 |
| 5.5.4 Deuterium fractionation | 95 |
| 5.6 Summary | 96 |
| 5.A Keplerian Masking | 97 |
| 6 Exploring DCO ⁺ as a tracer of thermal inversion in the disk around the Herbig Ae | |
| star HD163296 1 | .01 |
| 6.1 Introduction | 102 |
| 6.2 Methods | 103 |
| 6.2.1 Previous observation of HD 163296 | 103 |
| 6.2.2 Chemical model | 104 |
| 6.2.3 Implementation | 105 |
| 6.2.4 Radiative transfer | 106 |
| 6.3 Results | 107 |
| 6.3.1 Standard model (CD) | 107 |
| 6.3.2 Thermal inversion model (CD+TI) | 108 |
| 6.3.3 The CD+WD+TI model | 110 |
| 6.4 Discussion | 110 |
| 6.4.1 DCO ⁺ Outer radius | 110 |
| 6.4.2 Low vs high temperature deuteration pathways | 113 |
| 6.5 Summary | 113 |
| 6.A Residual channel maps | 114 |
