Title: Ecology of the Ethiopian wolf (*Canis simensis* Rüppell 1835) in a changing landscape: Human carnivore interactions in Afroalpine ecosystems of Ethiopia

Issue Date: 2017-09-05

Acknowledgements

This study could not have been happened without the permission and support of the Amhara National Regional State Environment, Forest and Wildlife Protection and Development Authority. In particular I would like to thank the General Director of the Authority, Mr Asefa Belay, who made the swift decision to grant permission for my study. I am grateful to Mr Fentaw Awayehu, Atsenaf Besteha, Michael Awed, Addisu Molla and Dargewu Belete for facilitating the permission of North Wollo Zone Environmental Protection Land Administration and Use Department.

To all those who funded this study the Ethiopian Wolf Conservation Programme, the Wildlife Conservation Network a Pat J. Miller Scholarship, the People's Trust for Endangered Species, the Rufford Foundation and the Louwes Fund for Water and Food I am deeply indebted to your support.

I am grateful to my promoter professor Geert de Snoo and co-promoter professor Hans de Iongh for your unfailing support, encouragements and positive attitude, all of which helped me greatly during some difficult times in recent years. I wish to show my appreciation to professor Hans de Iongh, who will retire soon; you are truly the kind of courageous father, friend and academic supervisor best suited to this job. Not only did you share your knowledge and experience with me, but you also proved to be patient and supportive when I needed it most. Thank you once again for your persistent care and sensible supervision, and I wish you all the best in your retirement. My special thanks go to my other co-promoter Dr Jorgelina Marino and her husband Professor Claudio Sillero-Zubiri for giving me the opportunity to work with the wolves on the Ethiopian Wolf Conservation Programme and to study at the universities of Oxford and Leiden. I would like to thank you both for organising funding for my project and for your assistance ever since the design stage of this study, both in Oxford and Ethiopia. Thank you so much for your confidence and faith in my ability to carry out this project to a successful conclusion and for your encouragement and perspicacious comments to me as a student, friend and work colleague. I hope together we can create a bright future for the Ethiopian wolf.

There were countless people who advised and supported me in Ethiopia, England and the Netherlands, and a full list would probably be a thesis in itself. However, I would like to express my special gratitude to my wife Agerie Debeb and my beloved children Abel, Kaleb and Mariamawit. I know you all have deserved a lot and I am proud of that. I hope you are also proud of me. Agerie, thank you for your unconditional love, encouragement and support.

Thank you for providing me with the education and opportunities that have enabled me to realise my dream!

I am enormously grateful to Anteneh Girma who trained both myself and my two field assistants in live rodent trapping. The fieldwork could not have been completed without the help of these two hard-working field assistants at high altitude, in rough terrain and in cold and wet weather conditions, so my special thanks go to Abebaw Abyie and Shimels Ababu. My thanks also go to Eric Bedin for his dedication as field coordinator of EWCP in facilitating my field logistics and for his positive advice and for following my progress by telephone from Bale. I am deeply indebted to you. My warmest thanks go to Edriss Ebu and Fekadu Lemma who helped me to make everything run smoothly. I am grateful to Dr Kees Musters for his advice on statistical analysis, Maarten van 't Zelfde and my friend Mohamed Adem for their help with GIS technology in order to make a map of my study area. My deepest indebtedness goes to Dr Zelealem Tefera who first introduced me to work with Claudio and Jorgelina. Dr Hans Bauer must get a special thank you for facilitating my acceptance in Leiden and for welcoming me in Leiden city when I first arrived. Dr Hans has stuck with me from start to finish, both as a friend and as an advisor. Thank you for that. I would like to thank all the people I interviewed for their time, honesty and collaboration. Also I would like to thank BSNP staff, particularly all the Park scouts, Warden Dejen Awoke and our focal person Solomon Abebe. It is only right to thank Abera Dagne and his wife. They helped us by sharing their home and food at Belechuma whilst the team were in the field.

Thank you to all my collaborators. From Ethiopia, Assaye Wondimagegnehu, Getachew Shiferaw, Worku LuLu, Asmare Tebeje, Betru Seyoum, Ges-siu Teshome, Shimels Belachew and Wolde Zebene. From Oxford, Professor David Macdonald, Dr Dawn Burman, Dr Christos Astaras, Dr Lucy Tallents, Dr Paul Johnson and Jenifer Spencer. From Leiden, Dr Laura Bertola, Dr Ellen Cieraad, Esther Philips, Sussana and Jory. I am grateful for your assistance with this study.

Last but not least, I would like to thank all my extended families in Addis Ababa and Bahirdar. To mention just a few people, my wife's mother Felek Bogale and my brothers and sisters in Addis Ababa. Yilma, Gashaw, Wubie, Shewaye, Aster, Kaleab and Birtkuan, thank you for your hospitality when I go to and come back from Europe. My special thanks go to Endalk Asegidew and Tamirat Eshete who have always been there for my family in my absence. Finally, this piece of work is dedicated to the memories of my beloved father Eshete Genbere and my mother Emahoy Sinkinesh Zikargie, who took me out of the darkness of illiteracy and into the light of education. I feel proud to dedicate this work in gratitude to you both. Thank you, thank you so much. Now I am here!
