General introduction

Reducing worry and subjective health complaints: A randomized trial of an internet-delivered worry postponement intervention

Changing mental health and positive psychological well-being using ecological momentary interventions: A systematic review and meta-analysis

Feasibility and effectiveness of a worry-reduction training using the smartphone: A pilot randomized controlled trial

Effectiveness of a smartphone-based worry-reduction training for stress reduction: A randomized controlled trial

Converging evidence that subliminal evaluative conditioning does not affect self-esteem or cardiovascular activity

General discussion
