Title: Human skin equivalents to study the prevention and treatment of wound infections

Date: 2018-03-28

A serene landscape at sunrise or sunset over a body of water. The sun is low on the horizon, creating a warm, golden glow. The sky is filled with soft, wispy clouds. The water reflects the light, and there is a layer of mist or fog over the surface. In the foreground, there are tall reeds and grasses, some of which are in shadow. The overall mood is peaceful and contemplative.

Human skin equivalents to
study the prevention and treatment
of wound infections
