Proefschrift

Ter verkrijging van  
De graad van Doctor aan de Universiteit Leiden  
Op gezag van Rector Magnificus prof.mr. C.J.J.M. Stolker  
volgens besluit van het College voor Promoties  
Te verdedigen op woensdag 28 maart 2018, Klokke 16.15

door

Elisabeth Marlene Haisma  
Geboren te Nieuwegein in 1986

**Promotor:**

Prof dr. J.T. van Dissel

**Co-promotoren:**

Dr. P. H. Nibbering

Dr. A. El Ghalbzouri

**Promotiecommissie:**

Prof. Dr. H.P. Haagsman (Utrecht University)

Prof. Dr. E. Middelkoop (VU University Amsterdam)

Prof. Dr. M.H. Vermeer

## Contents

Chapter 1:	General Introduction	7
Chapter 2:	Inflammatory and antimicrobial responses to methicillin-resistant <i>Staphylococcus aureus</i> in an <i>in vitro</i> wound infection model.	33
Chapter 3:	LL-37-derived peptides eradicate multidrug-resistant <i>Staphylococcus aureus</i> from thermally wounded human skin equivalents.	55
Chapter 4:	Next generation peptides based on P60.4AC, a synthetic derivative of the human cathelicidin LL-37, are highly effective against extensively and pandrug-resistant bacteria.	77
Chapter 5:	Antimicrobial Peptide P60.4Ac-Containing Creams and Gel for Eradication of Methicillin-Resistant <i>Staphylococcus aureus</i> from Cultured Skin and Airway Epithelial Surfaces	91
Chapter 6:	Reduced filaggrin expression is accompanied by increased <i>Staphylococcus aureus</i> colonization of epidermal skin models.	113
Chapter 7:	Surface-specific expression of alpha-toxin and other virulence factors by <i>Staphylococcus aureus</i> during biofilm formation	131
Chapter 8:	Summary and Future Perspectives	165
Chapter 9:	Nederlandse samenvatting (Dutch Summary)	189
	Curriculum Vitae	197
	List of publications	199
