Title: Student engagement in research in medical education

Issue Date: 2018-05-22

Student engagement in research in medical education

ICLON, Leiden University Graduate School of Teaching

Leiden University Medical Center

The research was carried out in the context of the *Dutch Interuniversity Center for Educational Sciences*

Title: Student engagement in research in medical education
Titel: Studentbetrokkenheid in onderzoek in het medisch onderwijs

ICLON PhD Dissertation Series

Print: Mostert & van Onderen! Leiden
Cover design: Wouter Huisman & Mayke Vereijken
Lay-out: Mostert & van Onderen!
ISBN/EAN: 978-94-90383-20-6

Student engagement in research in medical education

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof. mr. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op dinsdag 22 mei 2018
klokke 16.15 uur

door

Maria Wilhelmina Cornelia Vereijken

geboren te Bergeijk
in 1986

Promotores

Prof. dr. J.H. van Driel, University of Melbourne

Prof. dr. F.W. Dekker

Copromotor

Dr. R.M. van der Rijst

Promotiecommissie

Prof. dr. W.F. Admiraal

Prof. dr. S.F. Akkerman

Prof. dr. D.H.J.M. Dolmans, Universiteit Maastricht

Prof. dr. A.W.M. Kramer

Table of contents

1	General introduction	11
1.1	Introduction	12
1.2	Student engagement in research	13
1.3	Theoretical background	15
1.3.1	The role of research in teaching	15
1.3.2	The role of research in medical education	18
1.3.3	Studies into the research-teaching nexus	19
1.3.4	Research integrated into the curriculum	21
1.3.5	The relevance of student perceptions of research	22
1.3.6	The relevance of supervision practices	23
1.4	Outline of the dissertation	24
2	Authentic research practices throughout the curriculum in medical education	31
2.1	Introduction	33
2.1.1	Authentic research practices	33
2.1.2	Student perceptions and beliefs	35
2.1.3	Research aim	36
2.2	Educational context: The undergraduate medical programme and student research practices	37
2.3	Method	40
2.3.1	Study design	40
2.3.2	Participants	41
2.3.3	Instrument and procedure	43
2.3.4	Analysis	44
2.4	Results	45
2.5	Conclusions and discussion	48

3	Strengthening the integration of research into the first-year medical curriculum	53	5	Novice supervisors' practices and the dilemmatic space in the supervision of students' research projects	87
3.1	Introduction	55	5.1	Introduction	89
3.1.1	Relationships between student learning outcomes, beliefs and perceptions	57	5.1.1	Supervision of students' research projects in higher education	90
3.2	Educational context	59	5.1.2	Pedagogical choices in supervision practice	91
3.2.1	Fostering the integration of research into the study programme	61	5.1.3	Dilemmatic space	92
3.3	Methods	61	5.1.4	Novice supervisors' noticing	93
3.3.1	Data collection and instruments	61	5.1.5	The role of the discipline	94
3.3.2	Participants	65	5.1.6	Research aim	94
3.3.3	Analysis	65	5.2	Educational context	95
3.4	Results	66	5.3	Method	97
3.4.1	Student learning outcomes	66	5.3.1	Participants	97
3.4.2	Student beliefs and perceptions	67	5.3.2	Data collection and instrument	98
3.5	Discussion	68	5.3.3	Analysis	98
3.6	Conclusions	71	5.4	Results	100
4	Fostering first-year student learning through the integration of research into teaching	73	5.4.1	Teacher noticing and the dilemmatic space within the data	100
4.1	Introduction	75	5.4.2	Exploring relationships between the dilemmatic space and supervisors' practices	103
4.1.1	Student beliefs, perceptions and achievement	75	5.5	Conclusions and discussion	106
4.1.2	Student perceptions of the integration of research into teaching	76	5.5.1	Limitations and implications	108
4.1.3	Disciplinary differences in student perceptions of research	78	5.5.2	Conclusions	110
4.1.4	Research aim	79	6	General conclusions and discussion	111
4.2	Research setting and method	79	6.1	Brief overview	112
4.3	Results	81	6.2	Main findings	113
4.4	Discussion and conclusions	84	6.2.1	First study	113
			6.2.2	Second study	115
			6.2.3	Third study	116
			6.2.4	Fourth study	117

6.3 General conclusions	118	Appendix 4	177
6.3.1 Study program	119	Between-case data matrix of fragments reflecting relationships between the dilemmatic space and practices	
6.3.2 Teaching practices that stimulate student learning	120		
6.3.3 Student perceptions and beliefs	121		
6.3.4 Student learning outcomes	123	Appendix 5	181
6.4 Strengths and limitations	124	Coding scheme and examples of practices, actors and context factors using noticing as the sensitising concept	
6.4.1 Strengths	124		
6.4.2. Limitations	125		
6.5 Implications	126	Publications and presentations	183
6.5.1 Recommendations for future research	126		
6.5.2 Practical implications	128	Curriculum Vitae	191
6.6 Final comments	131	Dankwoord	193
References	133	ICLON PhD dissertation series	197
Summary	147		
Samenvatting	159		
Appendices	171		
Appendix 1	172		
The adapted version of the Student Perception of Research Integration Questionnaire for medical education (in Dutch)			
Appendix 2	174		
The adapted version of the Student Perception of Research Integration Questionnaire for medical education (in English)			
Appendix 3	177		
Grading rubric for first-year student research reports (translated from Dutch)
