Pathogenesis and Treatment of Skeletal Metastasis

Studies in animal models

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof.mr. P.F. van der Heijden,
volgens besluit van het College voor Promoties
te verdedigen op woensdag 21 januari 2009
klokke 15:00 uur

door

Jeroen Theodorus Buijs

geboren te Amsterdam
in 1979

Promotiecommissie

Promotor	prof.dr. S.E. Papapoulos
Co-promotor	dr. G. van der Pluijm
Referent	prof.dr. T.A. Guise (Univ. of Virginia, Charlottesville, VA, USA)
Overige leden	prof.dr. C.W.G.M. Löwik prof.dr. P. ten Dijke

The studies presented in this thesis were performed at the departments of Endocrinology and Metabolic Diseases, Pathology, and Urology at the Leiden University Medical Center, Leiden, The Netherlands and at the department of Urology, University of Bern, Inselspital, Switzerland.

The research described in this thesis was financially supported by grants from the Dutch Cancer Society (RUL2001-2485) and the European Sixth Framework programme PRIMA (FP504-587).

The printing of this thesis was financially supported by:

Jurriaanse Stichting
Procter & Gamble Pharmaceuticals Nederland B.V.
Astellas Pharma B.V.
Merck Sharp and Dohme B.V.
Eli Lilly Nederland B.V.
AstraZeneca B.V.
Amgen B.V.
Servier Nederland Farma B.V.
Merck Serono B.V.
Medtronic Spine
Novartis Oncology

Contents

Chapter 1.	General introduction partly published in <i>Cancer Letters, in press.</i>	9
Chapter 2.	Prognostic significance of periodic acid-Schiff-positive patterns in primary breast cancer and its lymph node metastases <i>Breast Cancer Res Treat</i> 2004; 84:117-30.	71
Chapter 3.	Optical imaging of cancer metastasis to bone marrow: a mouse model of minimal residual disease <i>Am J Pathol</i> 2002; 160:1143-53.	91
Chapter 4.	Interference with the microenvironment supports impairs the de novo formation of bone metastasis in vivo <i>Cancer Res</i> 2005; 65:7682-90.	109
Chapter 5.	Inhibition of bone resorption and growth of breast cancer in the bone microenvironment <i>Bone, in press.</i>	133
Chapter 6.	Bone morphogenetic protein 7 in the development and treatment of bone metastases from breast cancer. <i>Cancer Res</i> 2007; 215:8742-51	147
Chapter 7.	BMP7, a putative regulator of epithelial homeostasis in the human prostate, is a potent inhibitor of prostate cancer bone metastasis in vivo. <i>Am J Pathol</i> 2007; 171:1047-57.	171
Chapter 8.	General discussion	195
Chapter 9.	Summary – Samenvatting	225
